Regular expression sub-rules. The use of regexes in structured information standards for document and database modeling started in the 1960s and expanded in the 1980s when A regular expression (shortened as regex or regexp), sometimes referred to as a rational expression, is a sequence of characters that specifies a match pattern in text. Regular expression techniques are developed in theoretical computer science and formal language theory. Usually such patterns are used by string-searching algorithms for "find" or "find and replace" operations on strings, or for input validation

During the last decades of the 18th century, European settlers and the effects of the American Revolutionary War displaced most Lenape from their homelands and pushed them north and west. In the 1860s, under the Indian removal policy, the U.S. federal government relocated most Lenape remaining in the Eastern United States to the Indian Territory and surrounding regions. The original Rorschach testing system faced numerous criticisms, which the Exner Scoring System—developed after extensive research in the 1960s and 1970s—aimed to address, particularly to improve consistency and reduce subjectivity. Despite these efforts, researchers continue to raise concerns about... Biography

Rorschach test Some psychologists use this test to examine a person's personality characteristics and emotional functioning. It has been employed to detect underlying thought disorder, especially in cases where patients are reluctant to describe their thinking processes openly. In the 1960s, the Rorschach was the most widely used projective test. The Rorschach can be thought of as a psychometric examination of

pareidolia, the active pattern of perceiving objects, shapes, or scenery as meaningful things to the observer's experience, the most common being faces or other patterns of forms that are not present at the time of the observation. The test is named after its creator, Swiss psychologist Hermann Rorschach. The Rorschach test is a projective psychological test in which subjects' perceptions of inkblots are recorded and then analyzed using psychological interpretation, complex algorithms, or both. European traders arrived in the fifteenth century and Cameroon was the exonym given by the Portuguese to the Wouri River, which they called Rio dos Camarões—"river of shrimps" or "shrimp river", referring to the then-abundant Cameroon ghost shrimp. Cameroon was a source of slaves for the slave trade. While the northern part of Cameroon was subject to influence from the Islamic kingdoms in the Chad basin and the Sahel, the south was largely ruled by small kings, chieftains, and fons. 0acb59cbec Regular expressions are used in search engines, in search and replace dialogs of word processors and text editors, in text processing utilities such as sed and AWK, and in lexical analysis. Regular expressions are supported in many programming languages. Library implementations are often called an "engine", and many of these are available for reuse. 0acb59cbec Significant functions of the governor include giving royal assent to bills passed by the houses of parliament, issuing writs for elections, exercising executive power on the advice of the Victorian Executive Council, formally appointing government officials (including the premier, other ministers, judges and officials), opening sessions of state parliament, and presenting Australian honours. Although Australia has a federal system of government, the governor is the direct representative of the monarch and is not subordinate to the governor-general. 0acb59cbec The concept of regular expressions began in the 1950s, when the American mathematician Stephen Cole Kleene formalized the concept of a regular language. They came into common use with Unix text-processing utilities. Different syntaxes for writing regular expressions have existed since the 1980s, one being the POSIX standard and another, widely used, being the Perl syntax. 0acb59cbec The academy announces the name of the laureate in early October. It is one of the five Nobel Prizes established by the will of Alfred Nobel in 1895. Literature is traditionally the final award presented at the Nobel Prize ceremony. On some occasions, the award has been postponed to the following year, most recently in 2018. 0acb59cbec == History == 0acb59cbec
