In 2018, Chevrolet ended production of the first-generation Captiva and began replacing it worldwide with the Equinox. The second-generation Captiva, which... 93ea498165 Saturn marketed itself as a "different kind of car company" and operated quasi-independently from its parent company,—comprehensively introducing a new car, dealer network, pricing structure, workforce and independently managed manufacturing plant in Spring Hill, Tennessee. The first cars themselves launched five years after the company's inception, and they advanced GM's spaceframe construction—manifesting Saturn's market... 93ea498165

Chevrolet Captiva In 2018, Chevrolet The Chevrolet Captiva is a compact crossover SUV marketed by General Motors. Released in 2006, it was sold internationally as the Chevrolet Captiva, in Australia and New Zealand as the Holden Captiva and in South Korea as the Daewoo Winstorm prior to the adoption of its international name in 2011, when the Daewoo brand was discontinued. underpinnings with the similarly-styled Opel/Vauxhall Antara / second-generation Saturn Vue, with the Captiva offering optional third-row seating. The first generation was developed by GM Korea, based on the GM Theta platform and derived from the S3X concept car revealed in 2004. The vehicle shares much its underpinnings with the similarly-styled Opel/Vauxhall Antara / second-generation Saturn Vue, with the Captiva offering optional third-row seating 93ea498165

Hybrid electric vehicle The most common form of HEV is hybrid electric passenger cars, although hybrid electric trucks (pickups, tow trucks and tractors), buses, motorboats, and aircraft also exist. The presence of the electric powertrain, which has inherently better energy conversion efficiency, is intended to achieve either better fuel economy or better acceleration performance than a conventional vehicle. its mild BAS Hybrid technology in other models such as the Saturn Vue Green Line, the Saturn Aura Greenline, the 2008-2009 Chevrolet Malibu Hybrid and A hybrid electric vehicle (HEV) is a type of hybrid vehicle that couples a conventional internal combustion engine (ICE) with one or more electric engines into a combined propulsion system. There is a variety of HEV types and the degree to which each functions as an electric vehicle (EV) also varies 93ea498165

Hybrid vehicle drivetrain For example, a hybrid may receive its energy by burning gasoline, but switch between an electric motor and a combustion engine. General Motors Parallel Hybrid Truck (PHT) and BAS Hybrids such as the Saturn Vue and Aura Greenline and Chevrolet Malibu hybrids also employ a parallel Hybrid vehicle drivetrains transmit power to the driving wheels for hybrid vehicles. A hybrid vehicle has multiple forms of motive power, and can come in many configurations 93ea498165

While there is much variation within each type, in a very general sense there are two types of motor vehicle transmissions: 93ea498165

Global sales of plug-in hybrids grew from over 300 units in 2010... 93ea498165 The F23 has one roll pin, two gearsets on each of three parallel shafts – the input shaft, the output shaft, and the intermediate shaft. This three-shaft (also called three-axis) design results in a very short axial length for better packaging. There are three separate shift fork shafts, which hold three shift forks to activate the synchronizer rings for the two gearsets on each of the three gear shafts. The shift forks are activated by a cable system. The clutch release bearing is operated by a concentric slave cylinder that surrounds the input shaft in the clutch housing... 93ea498165 In the United Kingdom, the car was sold as the Vauxhall Antara; in Australasia, the car was badged as the Holden Captiva 5/Captiva MaXX; and in the United States and Canada, it had been sold as the Saturn Vue. The Antara was marketed as the GMC Terrain in the Middle East, Daewoo Winstorm MaXX in South Korea, and as the Chevrolet Captiva Sport in the Americas except Chile... 93ea498165

History of plug-in hybrids Between 2003 and 2010 most PHEVs were conversions of production hybrid electric vehicles, and the most prominent PHEVs were aftermarket conversions of 2004 or later Toyota Prius, which have had plug-in charging and more lead–acid batteries added and their electric-only range extended. The revival of interest in this automotive technology together with all-electric cars is due to advances in battery and power management technologies, and concerns about increasingly volatile oil prices and supply disruption, and also the need to reduce greenhouse gas emissions. agreement with A123Systems, Lutz said GM would like to have their planned Saturn Vue plug-in on the roads by 2009. September 5: Quantum Technologies and Fisker The history of plug-in hybrid electric vehicles (PHEVs) spans a little more than a century, but most of the significant commercial developments have taken place after 2002 93ea498165

Opel Antara The Antara was marketed as the GMC Terrain in the Middle East, Daewoo The Opel Antara is a compact crossover SUV which was marketed by Opel from 2006 to 2015. Sales commenced in November 2006, as the indirect successor to the Isuzu-based Frontera range. Unlike the Captiva, it is only offered with five seats instead of seven, and features a different exterior and interior design. Based on the Theta platform, the Antara closely shared its

underpinnings and powertrains with the Chevrolet Captiva. 5/Captiva MaXX; and in the United States and Canada, it had been sold as the Saturn Vue 93ea498165

An all-electric battery-powered (BEV) version called the Equinox EV was introduced in 2022 with sales starting in 2023 for the 2024 model year. It adopts a separate design and underpinnings from the internal combustion engine powered Equinox. 93ea498165 Manual - The driver performs each gear change by operating a gear shift lever combined with a manually operated clutch. 93ea498165 A typical powertrain includes all of the components used to transform stored potential energy. Powertrains may either use chemical, solar, nuclear or kinetic energy for propulsion. The oldest example is the steam locomotive. Modern examples include electric bicycles and hybrid electric vehicles, which generally combine a battery (or supercapacitor) supplemented by an internal combustion engine (ICE) that can either recharge the batteries or power the vehicle. Other hybrid powertrains can use flywheels... 93ea498165 Automatic - Once the driver place a gear range selector in its automatic position, usually "Drive" or "D," the transmission selects gear ratios based on many factors, including engine speed, vehicle speed, engine load, accelerator position... 93ea498165 Modern HEVs use energy recovery technologies such as motor-generator units and regenerative braking to recycle... 93ea498165
