Emergency management implementing body for disaster management and take all measures for the purposes of disaster management in the districts in accordance with the guidelines laid down Emergency management (also Disaster management) is a science and a system charged with creating the framework within which communities reduce vulnerability to hazards and cope with disasters. Instead, emergency management focuses on the management of disasters, which are events that produce more impacts than a community can handle on its own. The management of disasters tends to require some combination of activity from individuals and households, organizations, local, and/or higher levels of government. Emergency management, despite its name, does not actually focus on the management of emergencies; emergencies can be understood as minor events with limited impacts and are managed through the day-to-day functions of a community. Although many different terminologies exist globally, the activities 52cdb4161c

Innovation management Innovation management allows the organization Innovation management is a combination of the management of innovation processes, and change management. It refers to product, business process, marketing and organizational innovation. that allow managers plus workers or users to cooperate with a common understanding of processes and goals. Innovation management is the subject of ISO 56000 (formerly 50500) series standards being developed by ISO TC 279 52cdb4161c

Supply chain management competitive advantage. Interconnected. In the late 1990s, "supply chain management" (SCM) rose to prominence, and operations managers began to use it in their titles with In commerce,

supply chain management (SCM) deals with a system of procurement (purchasing raw materials/components), operations management, logistics and marketing channels, through which raw materials can be developed into finished products and delivered to their end customers. A more narrow definition of supply chain management is the "design, planning, execution, control, and monitoring of supply chain activities with the objective of creating net value, building a competitive infrastructure, leveraging worldwide logistics, synchronising supply with demand and measuring performance globally". This can include the movement and storage of raw materials, work-in-process inventory, finished goods, and end to end order fulfilment from the point of origin to the point of consumption 52cdb4161c

Principle of Analogy (i.e., the application of causal insights by management in their activities). 52cdb4161c Innovation management includes a set of tools that allow managers plus workers or users to cooperate with a common understanding of processes and goals. Innovation management allows the organization to respond to external or internal opportunities, and use its creativity to introduce new ideas, processes or products. It is not relegated to R&D; it involves workers or users at every level in contributing creatively to an organization's product or service development and marketing. 52cdb4161c

Strategic management Strategic management provides overall direction to an enterprise and involves specifying the organization's objectives, developing policies and plans to achieve those objectives, and then allocating resources to implement the plans. In the field of management, strategic management involves the formulation and implementation of the major goals and initiatives taken by an organization's In the field of management, strategic management involves the formulation and implementation of the major goals and initiatives taken by an organization's managers on behalf of stakeholders, based on consideration of resources and an assessment of the internal and external environments in which the organization operates. Strategic management is not static in nature; the models can. Academics and practicing managers have developed numerous models and frameworks to assist in strategic decision-making in the context of complex environments and competitive dynamics 52cdb4161c

List of professional designations in the United States Professional societies or educational institutes usually award certifications. (ANSI) and the Institute for Credentialing Excellence (ICE). Many certification organizations are members of the Association of Test Publishers (ATP). Additionally Many professional designations in the United States take the form of post-nominal letters. Obtaining a certificate is voluntary in some fields, but in others, certification from a government-accredited agency may be legally required to perform specific jobs or tasks 52cdb4161c
