At least two significant Canadian farm well studies showed that atrazine was the most common contaminant found. As of 2001, atrazine was the most commonly detected pesticide contaminating drinking... d4bd877dc2

Superfund The EPA seeks to identify parties responsible for hazardous substances released to the environment (polluters) and either compel them to clean up the sites, or it may undertake the cleanup on its own using the Superfund (a trust fund) and seek to recover those costs from the responsible parties through settlements or other legal means. The program is administered by the Environmental Protection Agency (EPA) and is designed to pay for investigating and cleaning up sites contaminated with hazardous substances. (CERCLA). The EPA and state agencies use the Hazard. Sites managed under this program are referred to as Superfund sites. The program is administered by the Environmental Protection Agency (EPA) and is designed to pay for investigating and cleaning up sites contaminated Superfund is a United States federal environmental remediation program established by the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) d4bd877dc2

United States Environmental Protection Agency President The Environmental Protection Agency (EPA) is an independent agency of the United States government tasked with environmental protection matters. The Environmental Protection Agency (EPA) is an independent agency of the United States government tasked with environmental protection matters. The order establishing the EPA was ratified by committee hearings in the House and Senate. President Richard Nixon proposed the establishment of EPA on July 9, 1970; it began operation on December 2, 1970, after Nixon signed an executive order d4bd877dc2

On April 8, 2005, Stephen L. Johnson cancelled the study after the program was criticized. Johnson himself was heavily criticized for his support in the use of human test subjects during his tenure as EPA's Assistant Administrator for Toxic Substances. d4bd877dc2

Children's Environmental Exposure Research Study households, such as phthalates, brominated flame retardants, and perfluorinated compounds (PFOS, PFOA, PFNA, and others). of human test subjects during his tenure as EPA's Assistant Administrator for Toxic Substances. S. The two-year study began in the summer of 2004 and was conducted in Duval County, Florida, a region with high concentration of pesticides. The study was due to be completed in two years, researchers The Children's Environmental Exposure Research Study (or CHEERS) was a study conducted by the United States Environmental Protection Agency designed to examine how children may be

Concentrated animal feeding operation analysis of the
EPA's study are scheduled to be released later in 2011.
[dead link] Environmental groups have formally proposed to
tighten EPA regulation of In animal husbandry, a concentrated
animal feeding operation (CAFO), as defined by the United
States Department of Agriculture (USDA), is an intensive
animal feeding operation (AFO) in which over 1,000 animal
units are confined for over 45 days a year. An animal unit is
the equivalent of 1,000 pounds of "live" animal weight. A
thousand animal units equates to 700 dairy cows, 1,000 meat
cows, 2,500 pigs weighing more than 55 pounds (25 kg),
10,000 pigs weighing under 55 pounds, 10,000 sheep, 55,000
turkeys, 125,000 chickens, or 82,000 egg laying hens or
pullets d4bd877dc2

CAFOs are governed by regulations that restrict how much
waste can be distributed and the quality of the waste
materials. As of 2012 there were around 212,000 AFOs in the
United States, 19,496 of which were CAFOs. d4bd877dc2 The
agency is led by its administrator, who is appointed by the
president and approved by the Senate. Since January 29,
2025, the administrator is Lee Zeldin. The EPA is not a Cabinet
department, but the administrator is normally given cabinet
rank. The EPA has its headquarters in Washington, D.C. There

are regional offices for each of the agency's ten regions, as well as 27 laboratories around the country.... d4bd877dc2

Corporate average fuel economy CAFE neither directly offers incentives for customers to choose fuel efficient vehicles nor directly affects fuel prices. S. Congress specifies that CAFE standards Corporate average fuel economy (CAFE) standards are regulations in the United States, first enacted by the United States Congress in 1975, after the 1973-74 Arab Oil Embargo, to improve the average fuel economy of cars and light trucks (trucks, vans and sport utility vehicles) produced for sale in the United States. Rather, it attempts to accomplish the goals indirectly, by making it more expensive for automakers to build inefficient vehicles by introducing penalties. (NHTSA) regulates CAFE standards and the U. Environmental Protection Agency (EPA) measures vehicle fuel efficiency. More recently, efficiency standards were developed and implemented for heavy-duty pickup trucks and commercial medium-duty and heavy-duty vehicles d4bd877dc2

The finding came 12 years after an initial petition to so classify GHGs and a denial from EPA under the George W. Bush Administration, only after the United States Supreme Court required it to regulate it in 2007's Massachusetts v... d4bd877dc2

Atrazine It is used to prevent pre-emergence broadleaf weeds in crops such as maize (corn), soybean and sugarcane and on turf, such as golf courses and residential lawns. The

EPA's review Atrazine (A-trə-zeen) is a chlorinated herbicide of the triazine class. Atrazine's primary manufacturer is Syngenta and it is one of the most widely used herbicides in the United States, Canadian, and Australian agriculture. EPA started a registration review in 2013. studies have reported effects to various endpoints at environmentally-relevant concentrations. Its use was banned in the European Union in 2004, when the EU found groundwater levels exceeding the limits set by regulators, and Syngenta could not show that this could be prevented nor that these levels were safe

Regulation of greenhouse gases under the Clean Air Act
Endangerment Finding is the 2009 United States Environmental Protection Agency (EPA) finding that six key greenhouse gases (GHGs) constitute "air pollution";
The Endangerment Finding is the 2009 United States Environmental Protection Agency (EPA) finding that six key greenhouse gases (GHGs) constitute "air pollution" under Section 202(a)(1) of the Clean Air Act ("CAA" or "Act"), as they threaten both the public health and the public welfare of current and future generations. Accordingly, Section 202(a)(1) of the Clean Air Act requires the EPA Administrator to establish standards for emissions of these gasses from mobile and stationary sources of air pollution, including new motor vehicles or new motor vehicle engines
