In the 2010s, software has become a key business differentiator. As a result, organizations now expect software development teams to deliver more, and more innovative, software within shorter delivery cycles. To meet these demands, teams have turned to lean approaches, such as Agile, DevOps, and Continuous Delivery, to try to speed up the systems development life cycle (SDLC). Change management change approaches into broader enterprise agility frameworks such as Scaled Agile Framework (SAFe) and DevOps. The emphasis shifted from managing discrete Change management (CM) is a discipline that focuses on managing changes within an organization.
