Cyanamide This white solid is widely used in agriculture and the production of pharmaceuticals and other organic compounds. It is also used as an alcohol-deterrent drug. Derivatives of this compound are also referred to as cyanamides, the most common being calcium cyanamide (CaCN_2). The molecule features a nitrile group attached to an amino group. solution of cyanamide is also used as a biocide (disinfectant) particularly in pig farming, because it effectively kills salmonella and shigella and fights Cyanamide is an organic compound with the formula CN_2H_2 b3f0b40011

Ethenone Ethenone is used to make acetic anhydride from acetic acid. It is an important reagent for acetylations. It is the simplest member of the ketene class. Generally Ethenone is the formal name for ketene, an organic compound with formula $\text{C}_2\text{H}_2\text{O}$ or $\text{H}_2\text{C}=\text{C}=\text{O}$. been observed to occur in space, in comets or in gas as part of the interstellar medium b3f0b40011

Pyrene Experiments in pigs show that urinary 1-hydroxypyrene is a metabolite of pyrene, when given orally. List of interstellar and circumstellar molecules Pyrene is a polycyclic aromatic hydrocarbon (PAH) consisting of four fused benzene rings, resulting in a flat aromatic system. This yellow-green solid is the smallest peri-fused PAH (one where the rings are fused through more than one face). The chemical formula is C₁₆H₁₀. Pyrene forms during incomplete combustion of organic compounds. linkages b3f0b40011

Isolated brain reasons, most research on isolated mammalian brains has been done with guinea pigs. It is the biological counterpart of brain in a vat. A related concept, attaching the brain or head to the circulatory system of another organism, is called a brain transplant or a head transplant. These animals have a significantly larger basilar artery compared to rats An isolated brain is a brain kept alive in vitro, either by perfusion or by a blood substitute, often an oxygenated solution of various salts, or by submerging the brain in oxygenated artificial cerebrospinal fluid (CSF). An isolated brain, however, is more typically attached to an artificial perfusion device rather than a biological body b3f0b40011
