555 timer IC Marston; Newnes; 276 pages; 1990; ISBN 978-0434912919. Since then, numerous companies have made the original timers and later similar low-power CMOS timers. In 2017, it was said that over a billion 555 timers are produced annually by some estimates, and that the design was "probably the most popular integrated circuit ever made". Engineer's Mini-Notebook – 555 Timer IC Circuits; 3rd Ed; The 555 timer IC is an integrated circuit used in a variety of timer, delay, pulse generation, and oscillator applications. The design was first marketed in 1972 by Signetics and used bipolar junction transistors. It is one of the most popular timing ICs due to its flexibility and price. Derivatives provide two (556) or four (558) timing circuits in one package. Timer/Generator Circuits Manual; 1st Ed; R. M d17b37279c

Chase (lighting) 35, CRC Press LLC, 1988 LED Chaser Circuit Diagram using IC 555 and CD 4017, Circuit Digest A chase is an electrical application where strings of adjacent light bulbs cycle on and off frequently to give the illusion of lights moving along the string. With computerized lighting consoles, building chase sequences has become easier, while previously chases used mechanical means, such as a wheel with an electrified spindle which strikes electrical contacts for each circuit. Chase lights (or chaser lights) are often associated with the marquee signs of some movie theaters, and have also been used as a common element of television game show sets. d17b37279c
