Circle A circle bounds a region of the plane called a disc. The distance between any point of the circle and the centre is called the radius. The distance between any point of A circle is a shape consisting of all points in a plane that are at a given distance from a given point, the centre. Italian: [ˌmaleˈboldʒe]; lit. 'evil ditches'), or Fraud, is the eighth circle of Hell. At the center of Malebolge is the ninth and final

circle of hell, known as Cocytus. It is a large, funnel-shaped cavern, itself divided into ten concentric circular trenches or ditches, each called a bolgia (Italian for 'pouch' or 'ditch'). 'evil ditches'), or Fraud, is the eighth circle of Hell. Long causeway bridges run from the outer circumference of Malebolge to its center, pictured as spokes on a wheel 52d648ca30

Glory (optical phenomenon) A glory is an optical phenomenon, resembling an iconic saint's halo around the shadow of the observer's head, caused by sunlight or (more rarely) moonlight A glory is an optical phenomenon, resembling an iconic saint's halo around the shadow of the observer's head, caused by sunlight or (more rarely) moonlight interacting with the tiny water droplets that comprise mist or clouds. Due to its appearance, the phenomenon is sometimes mistaken for a circular rainbow, but the latter has a much larger diameter and is caused by

different physical processes. The glory consists of one or more concentric, successively dimmer rings, each of which is red on the outside and bluish towards the centre 52d648ca30

The phenomenon can appear on any misty mountainside, cloud bank, or be seen from an aircraft, but the frequent fogs and low-altitude accessibility of the Brocken, the highest peak of the Harz Mountains in Germany, have created a local legend...

Sun cross The design is frequently found in the symbolism of prehistoric cultures A sun cross, solar cross, or wheel cross is a

solar symbol consisting of an equilateral cross inside a circle. The design is frequently found in the symbolism of prehistoric cultures, particularly during the Neolithic to Bronze Age periods of European prehistory. The symbol's ubiquity and apparent importance in prehistoric religion have given rise to its interpretation as a solar symbol, whence the modern English term "sun cross" (a calque of German: Sonnenkreuz). wheel cross is a solar symbol consisting of an equilateral cross inside a circle. The symbol means village in Ancient Egyptian (Gardiner symbol O49) 52d648ca30

The circle has been known since before the beginning of recorded history. Natural circles are common, such as the full moon or a slice of round fruit. The circle is the basis for the wheel, which, with related inventions such as gears, makes much of modern machinery possible. In mathematics, the study of the circle has helped inspire the

development of geometry,
astronomy and calculus.

HALO-8 also has a fashion division, H8LA. HALO-8's film catalog is split between in-house productions and third-party acquisitions. 52d648ca30 Large loop antennas: Also called self-resonant loop antennas or full-wave loops; they have a perimeter close to one or more whole wavelengths at the operating frequency, which makes them self-resonant at that frequency. Large loop antennas have a two-lobe dipole like

radiation pattern at their first, full-wave resonance, peaking in both directions perpendicular to the plane of the loop. 52d648ca30

The figure's head can be surrounded by a bright area called Heiligenschein, or halo-like rings of rainbow-coloured light forming a glory, which appear opposite the Sun's direction when uniformly sized water droplets in clouds refract and backscatter sunlight 52d648ca30
