first defines collapse: "a drastic decrease in human population size and/or political/economic/social complexity, over a considerable area, for an extended time. Finally, he answers the question, "What are the choices that we must make if we are to succeed, and not to fail. " He then reviews the causes of historical and pre-historical instances of societal collapse—particularly those involving significant influences from environmental changes, the effects of climate change, hostile neighbors, trade partners, and the society's response to the foregoing four challenges. It also considers why societies might not perceive a problem, might not decide to attempt a solution, and why an attempted
