Sanitary sewers are a type of gravity sewer and are part of an overall system called a "sewage system" or sewerage. Sanitary sewers serving industrial areas may also carry industrial wastewater. In municipalities served by sanitary sewers, separate storm drains may convey surface runoff directly to surface waters. An advantage of sanitary sewer systems is that they avoid combined sewer overflows. Sanitary sewers are typically much smaller in diameter than combined sewers which also transport urban runoff. Backups of raw sewage can occur if excessive stormwater inflow or groundwater infiltration occurs due to leaking...

The ride spins for a predetermined cycle until an automatic timer releases the hydraulic fluid from the arm, causing the platform to return to its horizontal position. The operator may be required to manually control the spin of the ride so that its exit aligns correctly with the exit gate. Most require the rider to be at least 42 inches tall. In the year 2023, an estimated 4,281,585 industrial robots were in operation worldwide according to International Federation of Robotics (IFR). As in the 2022 season, the 2023 season featured only one championship event as opposed to the two events that took place from 2017 to 2019 (and that were planned for 2020). In an effort to increase the number of teams that can attend the championship, there were no Week 7 events during the season to allow late-qualifying teams more time to prepare for the event and travel to Houston. Additionally, on...

The first reinforced concrete building in Southern Reinforced concrete, also called ferroconcrete or ferro-concrete, is a composite material in which concrete's relatively low tensile strength and ductility are compensated for by the inclusion of reinforcement having higher tensile strength or ductility. In terms of volume used annually, it is one of the most common engineering materials. The reinforcement is usually, though not necessarily, steel reinforcing bars (known as rebar) and is usually embedded passively in the concrete before the concrete sets. In corrosion engineering terms, when designed correctly, the alkalinity of the concrete protects the steel rebar from corrosion. skyscrapers made with reinforced concrete was the 16-story Ingalls Building in Cincinnati, constructed in 1904
