The centripetal force is directed at right angles to the motion and also along the radius towards the centre of the circular path. The mathematical... de96de18a2

Centripetal force The direction of the centripetal force is always orthogonal to the motion of the body and towards the fixed point of the instantaneous center of curvature of the path.). Isaac Newton coined the term, describing it as "a force by which bodies are drawn or impelled, or in any way tend, towards a point as to a centre".). ISBN 978-0-13-607791-6. Prentice Hall.
