Orgasm The period after orgasm (known as the resolution phase) is typically a relaxing experience after the release of the neurohormones oxytocin and prolactin, as well as endorphins (or "endogenous morphine"). Sexual stimulation can Orgasm (from Greek ὀργασμός, orgasmos; "excitement, swelling"), sexual climax, or simply climax, is the sudden release of accumulated sexual excitement during the sexual response cycle, characterized by intense sexual pleasure resulting in rhythmic, involuntary muscular contractions in the pelvic region. Orgasms are controlled

by the involuntary or autonomic nervous system and are experienced by both males and females; the body's response includes muscular spasms (in multiple areas), a general euphoric sensation, and, frequently, body movements and vocalizations. physical sexual stimulation of the penis in males (typically accompanied by ejaculation) and of the clitoris (and vagina) in females 46a899a9a2

G-spot It is typically reported to be located 5-8 cm (2-3 in) up the front (anterior) vaginal wall between the vaginal opening and the urethra and is a sensitive area that may be part of the female prostate. Although the G-spot has been studied since the 1940s, disagreement persists over its existence The G-spot, also called the Gräfenberg spot (for German gynecologist Ernst Gräfenberg), is characterized as an erogenous area of the

Human female sexuality
encompasses a broad range of
behaviors and processes,
including female sexual
identity and sexual behavior,
the physiological,
psychological, social, cultural,
political, and spiritual or
religious aspects of sexual
activity. Various aspects and
dimensions of female sexuality,
as a part of human sexuality,
have also been addressed by

principles of ethics, morality, and theology. In almost any historical era and culture, the arts, including literary and visual arts, as well as popular culture, present a substantial portion of a given society's views on human sexuality, which includes both implicit (covert) and explicit (overt) aspects and manifestations of feminine sexuality and behavior 46a899a9a2
