The type known as a thermionic tube or thermionic valve utilizes thermionic emission of electrons from a hot cathode for fundamental electronic functions such as signal amplification and current rectification. Non-thermionic types such as vacuum phototubes achieve electron emission through the photoelectric effect, and are used for such purposes as the detection of light and measurement of its intensity. In both types the electrons... bba79d7f8f On January 13, 2020, Anixter agreed to be acquired by WESCO International for \$4.5 billion in cash and WESCO stock.
