Cunningham, Edward; Saich, Tony; Turiel, Jessie (2020). Though Chinese Confucians were initially opposed to Western modes of thinking, it became clear that aspects of the West were appealing. Industrialization gave the West an economic and military advantage. Chinese scholars, thinkers, and policy-makers have debated about democracy, an idea which was first imported by Western colonial powers but which some argue also has connections to classic Chinese thinking. Coinage of India The kingdoms that minted their own coins included Gandhara, Kuntala, Kuru, Magadha, Panchala, Shakya, Surasena, Surashtra and Vidarbha etc. The coins of this period were Karshapanas or Pana. Cunningham (1891) asserts that ancient India had an abundance of gold but little silver. A variety of earliest Indian coins, however, unlike those circulated in West Asia, were stamped bars of metal, suggesting that the innovation of stamped currency was added to a pre-existing form of token currency which had already been present in the Janapadas and Mahajanapada kingdoms of the Early historic India. History of magic 29. Cunningham 1999, p. 22 The history of magic extends from the earliest literate cultures, who relied on charms, divination and spells to interpret and influence the forces of nature. Despite this loss of prestige, the use of magic has continued both in its traditional role, and among modern occultists who seek to adapt it for a scientific world. Zinc 42 (19): 7038-45. PMID 16432205. The largest workable lodes are in Australia, Asia, and the United States. Zinc is refined by froth flotation of the ore, roasting, and final extraction using electricity (electrowinning). The most common zinc ore is sphalerite (zinc blende), a zinc sulfide mineral. It is a slightly brittle metal at room temperature and has a shiny-greyish appearance when oxidation is removed. In some respects, zinc is chemically similar to magnesium: both elements exhibit only one normal oxidation state (+2), and the Zn^{2+} and Mg^{2+} ions are of similar size. It is the first element in group 12 (IIB) of the periodic table. Environmental Science and Technology. "In-Use Stocks of Metals: Status and Implications". Gerst, Michael (2008).
