

Using A Ds1307 With A Pic Microcontroller Application

Based on non-Atmel processors 6559038ece

Real-time clock Instruments, STMicroelectronics and Ricoh. A common RTC used in single-board computers is the Maxim Integrated DS1307. The RTC was introduced to PC compatibles A real-time clock (RTC) is an electronic device (most often in the form of an integrated circuit) that measures the passage of time 6559038ece

List of Arduino boards and compatible systems It lists boards in these categories:. They do not use microcontrollers compatible with the Arduino IDE, nor do they provide an alternative implementation This is a non-exhaustive list of Arduino boards and compatible systems. boards accept Arduino shield daughter boards 6559038ece

Development-environment compatible 6559038ece Arduino "shield" compatible 6559038ece Released under the official Arduino name 6559038ece Although the term often refers to the devices in personal computers, servers and embedded systems, RTCs are present in almost any electronic device which needs to keep accurate time of day. 6559038ece

Comparison of single-board microcontrollers Comparison of Single-board microcontrollers excluding Single-board computers Comparison of single-board computers "Arduino 101 | Arduino Documentation"; Comparison of Single-board microcontrollers excluding Single-board computers 6559038ece

Where different from the Arduino base feature set, compatibility, features, and licensing details are included.
