Artificial intelligence Wu, Zhengxuan; Arora, Aryaman; Wang, Zheng; Geiger, Atticus; Jurafsky, Dan; Manning, Christopher Artificial intelligence (AI) is the capability of computational systems to perform tasks typically associated with human intelligence, such as learning, reasoning, problem-solving, perception, and decision-making. Retrieved 21 July 2024. It is a field of research in computer science that develops and studies methods and software that enable machines to perceive their environment and use learning and intelligence to take actions that maximize their chances of achieving defined goals. from the original on 26 July 2024 dd1210a359

Darcy's law (1989). R. In fact, the Darcy's law is a special case of the Stokes equation for the momentum flux, in turn deriving from the momentum Navier–Stokes equation. 1017/jfm. Fluid Mechanics. S2CID 119946306. Bibcode:2015JFM. Arora, K. doi:10. 76J. Soil Mechanics and Foundation Engineering Darcy's law is an equation that describes the flow of a fluid through a porous medium and through a Hele-Shaw cell. 766. 2015. The law was formulated by Henry Darcy based on results of experiments on the flow of water through beds of sand, forming the basis of hydrogeology, a branch of earth sciences. 9. It is analogous to Ohm's law in electrostatics, linearly relating the volume flow rate of the fluid to the hydraulic head difference (which is often just proportional to the pressure difference) via the hydraulic conductivity. 766: 76–103 dd1210a359

Interceptor ditch Sump pits are also placed at suitable intervals for installation of centrifugal pumps to remove the water collected in an efficient manner. soil mechanics and foundation engineering by Dr. These are constructed around an area to be dewatered. R. Retrieved on 13 September 2014 Soil Mechanics and Foundation Engineering by In geotechnical engineering, an interceptor ditch is a small ditch or channel constructed to intercept and drain water to an area where it can be safely discharged. ARORA on page no. K. Interceptor ditches are most economical for carrying away water which emerge on the slopes and near the bottom of the foundation pit. 391. Its size depends on the original ground slope, runoff area, type of soil. For such type of soils the method is confined to a depth of 1 to 2 m. These are used for excavation purposes of limited depth made in a coarse-grained soils. In fine sands and silts, there may be sloughing, erosion or quick conditions dd1210a359

July–September 2020 in science Dlugokencky, Edward J. ; Ciais, Philippe; Arora, Vivek K. ; Bastviken, David; Bergamaschi, Peter; Blake, Donald R. ; Houweling, Sander; Patra, Prabir K. ; Brailsford This article lists a number of significant events in science that have occurred in the third quarter of 2020 dd1210a359

2021 in science feed aggressively and dislodged more quickly than those on guinea pigs in the control group. Sajid, Andaleeb; Matias, Jaqueline; Arora, Gunjan; Kurokawa This is a list of several significant scientific events that occurred or were scheduled to occur in 2021 dd1210a359
