History characterized by the methods they employ, such as quantitative history and digital history, which rely on quantitative methods and digital media. Some theorists categorize history as a social science, while others see it as part of the humanities or consider it a hybrid discipline. Similar debates surround the purpose of history—for example, whether its main aim is theoretical, to uncover the truth, or practical, to learn lessons from the past. Comparative History is the systematic study of the past, focusing primarily on the human past. In a more general sense, the term history refers not to an academic field but to the past itself, times in the past, or to individual texts about the past. As an academic discipline, it analyses and interprets evidence to construct narratives about what happened and explain why it happened d118f5df88

The majority of positivist social scientists use methods resembling those used in the natural sciences as tools for understanding societies, and so define science in its stricter modern sense. Speculative social scientists,
