Tensor density p. Lipcshutz; D.). 198. McGraw Hill In differential geometry, a tensor density or relative tensor is a generalization of the tensor field concept. A tensor density transforms as a tensor field when passing from one coordinate system to another (see tensor field), except that it is additionally multiplied or weighted by a power. New York: Schaum’s Outline Series. C. Parker (1994). ISBN 978-0-07-161545-7. Vector Analysis (2nd ed. Spellman (2009). B 3c6c983cf2

Automation Complicated systems, such as modern factories, airplanes, and ships typically use combinations of all of these techniques. and control systems"; JJ Di Steffano, AR Stubberud, IJ Williams. The benefit of automation includes labor savings, reducing waste, savings in electricity costs, savings in material costs, and improvements to quality, accuracy, and precision. Schaums outline series, McGraw-Hill 1967 Mayr, Otto (1970). The Origins of Feedback Control - Automation describes a wide range of technologies that reduce human intervention in processes, mainly by predetermining decision criteria, subprocess relationships, and related actions, as well as embodying those predeterminations in machines. Automation has been achieved by various means including mechanical, hydraulic, pneumatic, electrical, electronic devices, and computers, usually in combination 3c6c983cf2

of the Jacobian determinant of the coordinate transition function or its absolute value. A tensor density with a single index is called a vector density. A distinction is made among (authentic) tensor densities, pseudotensor densities, even tensor densities and odd tensor densities. Sometimes tensor densities with a negative weight 3c6c983cf2

Matrix (mathematics) : matrices) is a rectangular array of numbers or other mathematical objects with elements or entries arranged in rows and columns, usually satisfying certain properties of addition and multiplication. New York: Academic Press, LCCN 70097490 Bronson, Richard (1989), Schaum’s outline of theory and problems of matrix operations, New York: McGraw-Hill In mathematics, a matrix (pl 3c6c983cf2
