System of National Accounts Definitions of accounting terms, accounting concepts, account equations, account derivation principles and standard accounting procedures. The pre-edit version for the SNA 2025 revision was adopted by the United Nations Statistical Commission at its 56th Session in March 2025. The first international standard was published in 1953. Behind the accounts system, there is also a system of people: the people who are cooperating around the world to produce the statistics, for use by government agencies, businesspeople, media, academics and interest groups from all nations. Accounting and recording The System of National Accounts or SNA (until 1993 known as the United Nations System of National Accounts or UNSNA) is an international standard system of concepts and methods for national accounts. Manuals have subsequently been released for the 1968 revision, the 1993 revision, and the 2008 revision. It is nowadays used by most countries in the world b3d750d7b7

Turing test Since the Turing test is a test of indistinguishability The Turing test, originally called the imitation game by Alan Turing in 1949, is a test of a machine's ability to exhibit intelligent behaviour equivalent to that of a human. The results would not depend on the machine's ability to answer questions correctly, only on how closely its answers resembled those of a human. Since the Turing test is a test of indistinguishability in performance capacity, the verbal version generalizes naturally to all of human performance capacity, verbal as well as nonverbal (robotic). machine's ability to answer questions correctly, only on how closely its answers resembled those of a human. The evaluator tries to identify the machine, and the machine passes if the evaluator cannot reliably tell them apart. In the test, a human evaluator judges a text transcript of a natural-language conversation between a human and a machine b3d750d7b7
