Heavy lift In transportation, heavy lift refers to the handling and installation of heavy items which are indivisible, and of weights generally accepted to be over In transportation, heavy lift refers to the handling and installation of heavy items which are indivisible, and of weights generally accepted to be over 100 tons and of widths/heights of more than 100 meters. These oversized items are transported from one place to another (sometimes across country borders), then lifted or installed into place. Characteristic for heavy-lift goods is the absence of standardization, which requires individual transport planning f51c329fa9

Anderton Boat Lift The structure is designated as a scheduled monument, and is included in the National Heritage List for England; it is also known as one of the Seven Wonders of the Waterways. It provides a 50-foot (15. It provides a 50-foot (15. 2 m) vertical The Anderton Boat Lift is a two-caisson lift lock near the village of Anderton, Cheshire, in North West England. 2 m) vertical link between two navigable waterways: the River Weaver and the Trent and Mersey Canal. The Anderton Boat Lift is a two-caisson lift lock near the village of Anderton, Cheshire, in North West England f51c329fa9

Rajiv Dummugudem Lift Irrigation Scheme Rajiv Dummugudem lift irrigation scheme starting at 17°54'05"N 80°52'45"E is planned to supply irrigation water for 200,000 acres in Khammam and Warangal districts drawing Godavari River water from the Dummugudem pond. Rajiv Dummugudem Lift Irrigation Scheme (abbreviated RDLIS) is a lift irrigation scheme under execution which are located near Dummugudem, Khammam district Rajiv Dummugudem Lift Irrigation Scheme (abbreviated RDLIS) is a lift irrigation scheme under execution which are located near Dummugudem, Khammam district in Telangana, India. There are three lift irrigation schemes by names Rajiv Dummugudem lift irrigation scheme, Indirasagar Rudrammakota Dummugudem lift irrigation scheme and Dummugudem to Sagar tail pond canal project. Indira Dummugudem lift irrigation scheme starting at 17°33'49"N 81°14'49"E is planned to supply irrigation water for 200,000 acres in Khammam, Krishna and West Godavari districts drawing Godavari River water f51c329fa9

Built in 1875, the boat lift was in use for over 100 years until it was closed in 1983 due to corrosion. Restoration started in 2001 and the boat lift was re-opened in 2002. The lift and associated visitor centre and exhibition are operated by the Canal & River Trust. It is one of only two working boat lifts in the United Kingdom; the other is the Falkirk Wheel in Scotland. f51c329fa9

Tomlinson Lift Bridge The bridge forms a segment of U. The Tomlinson Vertical Lift Bridge carries four lanes of traffic across New Haven Harbor and a single-track freight line owned by the Providence & Worcester Railroad that connects the waterfront with the Northeast Corridor line of Metro North and CSX. The bridge forms a segment of U. S. Route 1. Lift Bridge is a crossing of the Quinnipiac River in New Haven, Connecticut. Route 1. S. A sidewalk is present along the southern edge of the bridge. The capacity, cost, and functionality of a gondola lift will differ dramatically depending on the combination of cables used for support and haulage and the type... f51c329fa9 Having noted the need for better transit between the town and its bays, particularly for tourists, the construction of Scarborough's first funicular commenced in 1873. Designed by William

Lucas and built by Crossley Brothers on a route between Scarborough Spa on South Sands and the South Cliff Esplanade, this water-driven lift was opened on 6 July 1875. During subsequent years, multiple other funiculars were constructed; in all, two lifts served Scarborough's North Bay while three covered the South Bay. Various means of propulsion, from steam power to electricity have been used over the years, while... f51c329fa9

Scarborough funiculars by Crossley Brothers on a route between Scarborough Spa on South Sands and the South Cliff Esplanade, this water-driven lift was opened on 6 July 1875 The British town of Scarborough has had a total of five cliff railways, or funiculars, two of which are presently operational. The town is home to the first funicular railway in the United Kingdom f51c329fa9

Gondola lift A gondola lift (cable car) is a means of cable transport and type of aerial lift which is supported and propelled by cables from above. It is often considered a continuous system since it features a haul rope which continuously moves and circulates around two terminal stations. It consists of A gondola lift (cable car) is a means of cable transport and type of aerial lift which is supported and propelled by cables from above. It consists of a loop of steel wire rope that is strung between two stations, sometimes over intermediate supporting towers. The cable is driven by a bullwheel in a terminal, which is typically connected to an engine or electric motor. In contrast, an aerial tramway operates solely with fixed grips and simply shuttles back and forth between two end terminals f51c329fa9

Rail Transport f51c329fa9

Aerial Lift Bridge The winning design came from John Low Waddell, who drew up plans for a high-rise vertical lift bridge. The span began life in 1905 as the United States' first transporter bridge: Only one other was ever constructed in the country, the Sky Ride in Chicago. The United States Army Corps of Engineers maintains a nearby maritime museum. It remains in operation. The span was converted in 1929–1930 to a vertical-lift bridge, also rather uncommon, although

there are six such bridges along Ontario's Welland Canal. The bridge is owned and operated by the City of Duluth. The bridge was added to the National Register of Historic Places on May 22, 1973. The city of Duluth was eager to build the bridge The Aerial Lift Bridge, earlier known as the Aerial Bridge or Aerial Ferry Bridge, is a landmark in the port city of Duluth, Minnesota f51c329fa9

Air Transport f51c329fa9

Karnin Lift Bridge 53°50'37"N 13°51'20"E / 53. The lifting part of the bridge has stood since the end of the Second World War as a relic and technical monument in the middle of the Peenestrom. 84361°N 13. 85556°E / 53. It was nominated for designation as a Historic Symbol of Engineering in Germany. It was part of the old Ducherow-Swinemünde railway. 84361; 13. 85556 The Karnin Lift Bridge (German: Hubbrücke Karnin) is a railway bridge over the Peenestrom The Karnin Lift Bridge (German: Hubbrücke Karnin) is a railway bridge over the Peenestrom estuary in North Germany that was opened in 1933 and destroyed in 1945 f51c329fa9

Mode Of Transport f51c329fa9

Surface lift A surface lift is a type of cable transport for mountain sports in which skiers, snowboarders, or mountain bikers remain on the ground as they are pulled A surface lift is a type of cable transport for mountain sports in which skiers, snowboarders, or mountain bikers remain on the ground as they are pulled uphill. Today, surface lifts are most often found on beginner slopes, small ski areas, and peripheral slopes. They are also often used to access glacier ski slopes because their supports can be anchored in glacier ice due to the lower forces and realigned due to glacier movement. While they were once prevalent, they have been overtaken in popularity by higher-capacity and higher-comfort aerial lifts, such as chairlifts and gondola lifts f51c329fa9
