Thought In a broader sense, any mental event—including perception and unconscious processes—may be described as a form of thought. Unlike perception, these activities can occur without immediate input from the sensory organs. Core forms include judging, reasoning, concept formation, problem solving, and deliberation. The term can also denote not the process itself, but the resulting mental states or systems of ideas. Other processes, such as entertaining an idea, memory, or imagination, are also frequently considered types of thought. In their most common sense, thought and thinking refer to cognitive processes that occur independently of direct sensory stimulation.
