Anima and animus guide. "Like Sophia, this is the highest level of mediation between the unconscious and conscious mind. They are considered animistic parts within the Self, with Jung viewing parts of the self as part of the infinite set of archetypes within the collective unconscious. Carl Jung described the animus as the unconscious masculine side of a woman, and the anima as the unconscious feminine side of a man, each transcending the personal psyche. [citation needed] In the book The Invisible Partners The anima and animus are a pair of dualistic, Jungian archetypes which form a syzygy, or union of opposing forces

Guide dog Although dogs can be trained to navigate various obstacles, they are red-green colour blind and incapable of interpreting street signs. In several countries guide dogs, along with most other service and hearing dogs, are exempt from regulations against the presence of animals in places such as restaurants and public transportation. The handler might be likened to an aircraft's navigator, who must know how to get from one place to another, and the dog is the pilot, who gets them there safely. The human does the directing, based on skills acquired through previous mobility training. Invisible hand Smith originally mentioned the term in two specific, but different, economic examples. The invisible hand is a metaphor inspired by the Scottish economist and moral philosopher Adam Smith that describes the incentives which free markets The invisible hand is a metaphor inspired by the Scottish economist and moral philosopher Adam Smith that describes the incentives which free markets sometimes create for self-interested people to accidentally act in the public interest, even when this is not something they intended. It is used once in his Theory of Moral Sentiments when discussing a hypothetical example of wealth being concentrated in the hands of one person, who wastes his wealth, but thereby employs others. In both cases, Adam Smith speaks of an invisible hand. More famously, it is also used once in his Wealth of Nations, when arguing that governments do not normally need to force international traders to invest in their own home country

However, in recent years, the division between the social and medical models has been challenged. Alternative models of disability have increased, allowing for greater complexity and specificity in how disability is theorized. Additionally, there has been an increased focus on interdisciplinary...
