

Giancoli Physics 5th Edition Online

This page contains discussions that have been archived from Village pump (assistance). Please do not edit the contents of this page. If you wish to revive any of these discussions, either start a new thread or use the talk page associated with that topic. 1fb3046a11 Village pump (assistance) archive 1fb3046a11 Neutrons are found, together with a similar number of protons in the nuclei of atoms. Atoms of a chemical element that differ only in neutron number are called isotopes. Free neutrons are produced copiously in nuclear fission and fusion. They are a primary contributor to the nucleosynthesis of chemical elements within stars through fission, fusion, and neutron capture processes. Neutron stars, formed from massive collapsing stars, consist of neutrons... 1fb3046a11

Neutron Englewood Cliffs, N. General physics. ISBN 978-0-13-350884-0 The neutron is a subatomic particle, symbol n or n0, that has no electric charge, and a mass slightly greater than that of a proton. The neutron was discovered by James Chadwick in 1932, leading to the discovery of nuclear fission in 1938, the first self-sustaining nuclear reactor (Chicago Pile-1, 1942) and the first nuclear weapon (Trinity, 1945). J: Prentice-Hall. Giancoli, Douglas C. from the original on 2019-05-09. (1984). Retrieved 2024-05-01 1fb3046a11
