Aortic stenosis It typically gets worse over time. It may occur at the aortic valve as well as above and below this level. If heart failure, loss of consciousness, or heart related chest pain occur due to AS the outcomes are worse. Symptoms often come on gradually, with a decreased ability to exercise often occurring first. Thickening of the valve without causing obstruction is known as aortic sclerosis. Signs of heart failure include shortness of breath especially when lying down, at night, or with exercise, and swelling of the legs. Thickening of the valve Aortic stenosis (AS or AoS) is the narrowing of the exit of the left ventricle of the heart (where the aorta begins), such that problems result. Loss of consciousness typically occurs with standing or exercising. Signs of heart failure include shortness of breath especially when lying down, at night, or with exercise, and swelling of the legs 6b6b725d0c

Glossary of medicine the insertion of a catheter into a chamber or vessel of the heart. This is done both for diagnostic and interventional purposes. Cardiac muscle - (also This glossary of medical terms is a list of definitions about medicine, its sub-disciplines, and related fields 6b6b725d0c

Causes include being born with a bicuspid aortic valve, and rheumatic... 6b6b725d0c

Spironolactone It can also be used to block the effects of testosterone as a part of feminizing hormone therapy. It can be used to treat fluid build-up due to liver disease or kidney disease. Other uses include acne and excessive hair growth in

women, low blood potassium that does not improve with supplementation, high blood pressure that is difficult to treat and early puberty in boys. Other uses include acne and excessive hair growth Spironolactone, sold under the brand name Aldactone among others, is classed as a diuretic medication. used to reduce risk of disease progression, hospitalization and death due to some types of heart failure. It is also used to reduce risk of disease progression, hospitalization and death due to some types of heart failure. Spironolactone is usually available in tablets, taken by mouth, though topical forms are also available 6b6b725d0c

Traumatic brain injury TBI can also be characterized based on mechanism (closed or penetrating head injury) or other features (e. neurotransmitter glutamate (excitotoxicity), influx of calcium and sodium ions into neurons, and dysfunction of mitochondria. TBI can be classified based on severity ranging from mild traumatic brain injury (mTBI/concussion) to severe traumatic brain injury. , occurring in a specific location or over a widespread area). g. Injured axons in the brain's white matter A traumatic brain injury (TBI), also known as an intracranial injury, is an injury to the brain caused by an external force. Head injury is a broader category that may involve damage to other structures such as the scalp and skull. TBI can result in physical, cognitive, social, emotional and behavioral symptoms, and outcomes can range from complete recovery to permanent disability or death 6b6b725d0c

An actin protein is the monomeric subunit of two types of filaments in cells: microfilaments, one of the three major components of the cytoskeleton, and thin filaments, part of the contractile apparatus in muscle cells. It can be present as either a free monomer called G-actin (globular) or as part of a linear polymer microfilament called F-actin (filamentous), both of which are essential for such important cellular functions as the mobility and contraction of cells during cell division... 6b6b725d0c

COVID-19 pandemic Soon after, it spread to other areas of Asia, and then worldwide in early 2020. of breath, loss of smell, muscle weakness, low fever and cognitive dysfunction. Many countries attempted to slow or stop the spread of COVID-19 by recommending The COVID-19 pandemic (also known as the coronavirus pandemic and COVID pandemic), caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), began with an outbreak of COVID-19 in Wuhan, China, in December 2019. The World Health Organization (WHO) declared the outbreak a public health emergency of international concern (PHEIC) on 30 January 2020, and assessed the outbreak as having become a pandemic on 11 March 6b6b725d0c

The cause of type 1 diabetes is not completely understood, but it... 6b6b725d0c

Sexual intercourse These activities involve physical intimacy between two or more people and are usually used among humans. "Female Sexual Function and Dysfunction". Sexual penetration is an instinctive form of sexual behaviour and psychology among humans. 1016/j Sexual intercourse (also coitus or copulation) is a sexual activity typically involving the insertion of the erect male penis inside the female vagina and followed by thrusting motions for sexual pleasure, reproduction, or both. 35 (2): 169–183. This is also known as vaginal intercourse or vaginal sex. Other forms of penetrative sexual intercourse include anal sex (penetration of the anus by the penis), oral sex (penetration of the mouth by the penis or oral penetration of the female genitalia), fingering (sexual penetration by the fingers) and penetration by use of a dildo (especially a strap-on dildo), and vibrators. doi:10. Obstetrics and Gynecology Clinics of North America. Kammerer-Doak D, Rogers RG (June 2008) 6b6b725d0c

Type 1 diabetes T1D results in high blood sugar levels in the body prior to treatment. Glucagon secretion is normally Diabetes mellitus type 1, commonly known as type 1 diabetes (T1D), and formerly known as juvenile diabetes, is an autoimmune disease that occurs when the body's immune system destroys pancreatic cells (beta cells). Insulin is a hormone required by the body to store and convert blood sugar into energy. Additional symptoms may include blurry vision, tiredness, and slow wound healing (owing to impaired blood flow). While some cases take longer, symptoms usually appear within weeks or a few months. Common symptoms include frequent urination, increased thirst, increased hunger, weight loss, and other complications. In healthy persons, beta cells produce insulin. hypoglycemia triggering abnormal heart rhythms or cardiac autonomic neuropathy, damage to nerves that control the function of the heart 6b6b725d0c

COVID-19 symptoms range from asymptomatic to deadly, but most commonly include fever, sore throat, nocturnal cough, and fatigue. Transmission of the virus is often through airborne particles. Mutations have produced many strains (variants) with varying degrees of infectivity and virulence. COVID... 6b6b725d0c

Actin size and function of the heart as well as deafness. It is found in essentially all eukaryotic cells, where it may be present at a concentration of over 100 μM ; its mass is roughly 42 kDa, with a diameter of 4 to 7 nm. The make-up of the cytoskeleton is also related to the pathogenicity of intracellular bacteria and viruses Actin is a family of globular multi-functional proteins that form microfilaments in the cytoskeleton, and the thin filaments in muscle fibrils 6b6b725d0c
