It is an area of applied psychology practiced by a school psychologist. School psychology is a field that applies principles from educational psychology, developmental psychology, clinical psychology, community psychology, and School psychology is a field that applies principles from educational psychology, developmental psychology, clinical psychology, community psychology, and behavior analysis to meet the learning and behavioral health needs of children and adolescents c49cc070df

Educational psychology can in part be understood through its relationship with other disciplines. It is informed... c49cc070df The field is generally considered to have begun in 1896 with the opening of the first psychological clinic at the University of Pennsylvania by Lightner Witmer. In the first half of the 20th century, clinical psychology was... c49cc070df Psychology as a field of experimental study began in 1854 in Leipzig, Germany, when Gustav Fechner created the first theory of how judgments about sensory experiences are made and how to experiment on them. Fechner's theory, recognized today as

Signal Detection Theory, foreshadowed the development of statistical theories of comparative judgment and thousands of experiments based on his ideas (Link, S. W. Psychological Science, 1995). In 1879, Wilhelm Wundt founded the first psychological laboratory dedicated exclusively to psychological research in Leipzig, Germany. Wundt was... c49cc070df

Adaptationist thinking about physiological mechanisms, such as the heart, lungs, and the liver, is common in evolutionary biology. Evolutionary psychologists apply the same thinking in psychology, arguing that just as the heart evolved to pump blood, the liver evolved to detoxify poisons, and the kidneys evolved to filter turbid fluids there is modularity of mind in that... c49cc070df

Individual psychology The English edition of Adler's work on the subject, The Practice and Theory of Individual Psychology (1924), is a collection of papers Individual psychology (German: Individualpsychologie) is a psychological method and school of thought founded by the Austrian psychiatrist Alfred Adler. psychiatrist Alfred Adler.
