Biofuel Biofuel can be produced from plants or from agricultural, domestic or industrial bio waste. Indian Institute Biofuel is a fuel that is produced over a short time span from biomass, rather than by the very slow natural processes involved in the formation of fossil fuels such as oil. Biofuels (and bio energy in general) are regarded as a renewable energy source. Biofuels are mostly used for transportation, but can also be used for heating and electricity. Retrieved 14 July 2010. "Bio-Ethers as Transportation Fuel: A Review" (PDF). July 2011. Sukla MK, Bhaskar T, Jain AK, Singal SK, Garg MO. The use of biofuel has been subject to criticism regarding the "food vs fuel" debate, varied assessments of their sustainability, and ongoing deforestation and biodiversity loss as a result of biofuel production 62b30cbcd5
