Self-fulfilling prophecy Cambridge, United Kingdom : Cambridge University A self-
fulfilling prophecy is a prediction that comes true at least in part as a result of a
person's belief or expectation that the prediction would come true. n292,
ISBN 9781412986892 Blundell, Jonathan (2014). 4135/9781452276052. Merely
applying a label to someone or something can affect the perception of the
person/thing and create a self-fulfilling prophecy. Interpersonal communication plays
a significant role in establishing these phenomena as well as impacting the labeling
process. A self-fulfilling prophecy can have either negative or positive outcomes. In
the phenomena, people tend to act the way they have been expected to in order to
make the expectations come true. Self-fulfilling prophecies are an example of the
more general phenomenon of positive feedback loops. Cambridge IGCSE® sociology
