VR photography is the art of capturing or creating a complete scene as a single image, as viewed when rotating about a single central position. Normally created by stitching together a number of photographs taken in a multi-row 360-degree rotation or using an omnidirectional camera, the complete virtual reality image can also be a totally computer-generated effect, or a composite of photography and computer generated objects. The history of VR photography is human-computer... b0cd8361fe Like the 50D, the camera has an LCD of settings on the top of the camera where the ISO, AF-Mode, Shooting mode, and metering mode can be controlled. b0cd8361fe
