x86 versions of ntoskrnl.exe depend on bootvid.dll, hal.dll and kdcom.dll (x64 variants of ntoskrnl.exe have these DLLs embedded in the kernel to improve performance). However, it is not a native application, thus it is not linked against ntdll.dll. Instead, ntoskrnl.exe has its own entry point KiSystemStartup that calls the architecture-independent kernel initialization function. Because it requires a static copy of the C Runtime objects, the executable is usually about 10 MB in size. b0675298d9 Александров, Михаил; Соколов, Арсений (2013-02-09). Old Exe Bridge The bridge is the oldest surviving bridge of its size in England and the oldest bridge in Britain with a chapel still on it. The Old Exe Bridge is a ruined medieval bridge in Exeter in south-western England. It replaced several rudimentary crossings which had been in use sporadically since Roman times. Construction of the bridge began in 1190, and was completed by 1214 The Old Exe Bridge is a ruined

medieval bridge in Exeter in south-western England. No known records survive of the bridge's builders. The result was a bridge at least 590 feet (180 metres) long, which probably had 17 or 18 arches, carrying the road diagonally from the west gate of the city wall across the River Exe and its wide, marshy flood plain. The project was the idea of Nicholas and Walter Gervase, father and son and influential local merchants, who travelled the country to raise funds.
