Instant-runoff voting In each round, the candidate with the fewest first-preferences (among the remaining candidates) is eliminated. Sturgis, Alice (2001). Instant runoff falls under the plurality-with-elimination family of voting methods, and is thus closely related to rules like the two-round runoff system. Robert's Rules of Order Newly Revised (11th ed. This continues until only one candidate is left. Da Capo Press. 425–428. The Instant-runoff voting (IRV; US: ranked-choice voting (RCV), AU: preferential voting, UK/NZ: alternative vote) is a single-winner ranked voting election system where one or more eliminations are used to simulate multiple runoff elections. pp. Robert, Henry (2011). ).
