List of unsolved problems in mathematics Hilbert’s sixteenth problem: what are the possible Many mathematical problems have been stated but not yet solved. Some problems belong to more than one discipline and are studied using techniques from different areas. Hilbert’s fifteenth problem: put Schubert calculus on a rigorous foundation. These problems come from many areas of mathematics, such as theoretical physics, computer science, algebra, analysis, combinatorics, algebraic, differential, discrete and Euclidean geometries, graph theory, group theory, model theory, number theory, set theory, Ramsey theory, dynamical systems, and partial differential equations. Prizes are often awarded for the solution to a long-standing problem, and some lists of unsolved problems, such as the Millennium Prize Problems, receive considerable attention. entries all equal to 1 or −1

Artificial intelligence (1998, chpt. 3) Representing events and time:Situation calculus, event calculus, fluent calculus (including solving the frame problem): Russell & Norvig Artificial intelligence (AI) is the capability of computational systems to perform tasks typically associated with human intelligence, such as learning, reasoning, problem-solving, perception, and decision-making. It is a field of research in computer science that develops and studies methods and software that enable machines to perceive their environment and use learning and intelligence to take actions that maximize their chances of achieving defined goals. 18

Despite its likely origin as a content fork, the article has now been set out to cover a different scope as strict conditional. The discussion below has also come to an agreement that while the article should not stand as is, deleting the page altogether is not the best solution, with most arguing for "deletion" actually meaning to turn it into a disambiguation page. Therefore, I believe that in this situation, deletion is obviously not the correct outcome, and the decis... 5 60 105
