

Experience Human Development 12th Edition By Papalia

Adolescence The World Health Organization definition officially designates adolescence as the phase. Some definitions start as early as 10 and end as late as 30. Adolescence is usually associated with the teenage years, but its physical, psychological or cultural expressions may begin earlier or end later. Physical growth (particularly in males) and cognitive development can extend past the teens. Puberty typically begins during preadolescence, particularly in females. Age provides only a rough marker of adolescence, and scholars have not agreed upon a precise definition. Latin *adolescere* 'to mature') is a transitional stage of human physical and psychological development that generally occurs during the period from puberty to adulthood (typically corresponding to the age of majority)

Developmental psychology p. Feldman RD, Papalia DE (2010). This field examines change across three major dimensions, which are physical development, cognitive development, and social emotional development. ISBN 978-0-07-353204-2 Developmental psychology is the scientific study of how and why humans grow, change, and adapt across the course of their lives. New York: McGraw-Hill. p. 151. Within these three dimensions are a broad range of topics including motor skills, executive functions, moral understanding, language acquisition, social change, personality, emotional development, self-concept, and identity formation. 150. 57. A child's world: infancy through adolescence (12th ed. Developmental psychologists aim to explain how thinking, feeling, and behaviors change throughout life. Berk 2012, p.). Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire lifespan

A good article (GA) is a Wikipedia article that meets a core set of editorial standards, the good article criteria, passing through the good article nomination process successfully. They are well-written, contain factually accurate and verifiable information, are broad in coverage, neutral in point of view, stable, and illustrated, where possible, by relevant images with suitable copyright licenses. Good articles do not have to be as comprehensive as featured articles (FA), but they should not omit any major facets: a comparison of the criteria for good and featured articles describes further differences.
