History of computer animation Further development of the Maya software The history of computer animation began as early as the 1940s and 1950s, when people began to experiment with computer graphics – most notably by John Whitney. Much computer graphics at this time involved 2-D imagery, though increasingly as computer power improved, efforts to achieve 3-D realism became the emphasis. It was only by the early 1960s when digital computers had become widely established, that new avenues for innovative computer graphics blossomed. By the late 1980s, photo-realistic 3-D was beginning to appear. Initially, uses were mainly for scientific, engineering and other research purposes, but artistic experimentation began to make its appearance by the mid-1960s – most notably by Dr. By the mid-1970s, many such efforts were beginning to enter into public media. used for visual effects and movies (such as Toy Story, Casper,

Guido van Rossum began working on Python in the late 1980s as a successor to the ABC programming language. Python 3.0, released in 2008, was a major revision not completely backward-compatible with earlier versions. Recent versions, such as Python 3.12, have added capabilities and keywords for typing (and more; e.g. increasing speed); helping with (optional) static typing. Currently only versions in the 3.x series are supported. 328baa3c18

Disc jockey Anja Schneider, Peggy Gou, Maya Jane Coles, and Eli & Fur. Originally, the "disc" in "disc jockey" referred to shellac and later vinyl records, but nowadays DJ is used as an all-encompassing term to also describe persons who mix music from other recording media such as cassettes, CDs or digital audio files on a CDJ, controller, or even a laptop. American DJ The Blessed Madonna has been called "one of the world's most exciting turntablists"; A disc jockey, more commonly abbreviated as DJ, is a person who plays recorded music for an audience.
