

Chapter 12 Designing A Cr Test Bed

Practical Issues

Wi-Fi of Fame. 11 family of standards, which are commonly used for local area networking of devices and Internet access, allowing nearby digital devices to exchange data by radio waves. These are the most widely used computer networks, used globally in home and small office networks to link devices and to provide Internet access with wireless routers and wireless access points in public places such as coffee shops, restaurants, hotels, libraries, and airports. In 1989 in Australia, a team of scientists began working on wireless LAN technology. A prototype test bed for a wireless local area network (WLAN) Wi-Fi () is a family of wireless network protocols based on the IEEE 802.11 standard.
