Between 1925 and 1928, Ny-Ålesund saw four air expeditions to the North Pole, two of which required the construction of an airship hangar and mast. The first proposal for an airport in Ny-Ålesund was launched in 1956 by Norsk Polar Navigasjon, who proposed an airport at Kvadehuksletta. Soviet protests against... eb30f9229d On its own, the term "latitude" normally refers to the geodetic latitude as defined below. Briefly, the geodetic latitude of a point is the angle formed between the vector perpendicular (or normal) to the ellipsoidal surface from the point, and the plane of the equator. eb30f9229d A home console port for the Sega Saturn was announced, but ultimately canceled, resulting in the game staying an arcade exclusive until 2005 with the compilation... eb30f9229d

Sonic the Fighters The 2012 re-release added Metal Sonic, Doctor Robotnik, and Honey Sonic the Fighters, also known as Sonic Championship, is a 1996 three-dimensional fighting video game from Sega. Chameleon, Fang the Sniper, and new characters Bean the Dynamite and Bark the Polar Bear. Sonic the Fighters was made using the fighting engine for Fighting Vipers (1995), and it was the first 3D game in the Sonic series; the idea for a Sonic fighting game was conceived when a Sega AM2 programmer experimented with a 3D Sonic the Hedgehog model in Fighting Vipers, its animation impressing and convincing the Sonic Team to approve the project. The game, developed by Sega AM2 and built on their Model 2 arcade system, pits players in one-on-one battles with a roster of characters from the Sonic the Hedgehog series eb30f9229d

The 200 Series was produced in sedan, station wagon, and limited convertible body styles. Over 2.8 million units were manufactured during its 19-year production run, making it one of Volvo's most successful model lines. The series established Volvo's reputation for safety and durability, with many examples remaining in service decades after production ended. eb30f9229d Duganella is named after the American microbiologist, P.R. Dugan, who first isolated the organism from sewage and polluted water. Duganella is in class Betaproteobacteria and order Burkholderiales. The molecular percent of Duganella's G/C content is 63–64. Morphological characteristics consist of: straight or slightly curved rods, and in liquid growth media, either colonies that are “occasionally fingerlike,” appear, or dispersed growth with little or no formation of colonies appear. When grown on nutrient agar, the colonies are

pale yellow to "straw-colored." Duganella is able to produce violacein, a vibrant purple compound derived from the condensation of two molecules of tryptophan that is known to be anti-tumor, anti-fungal... eb30f9229d

SOS Manual of Wireless Telegraphy for the Use of Naval Electricians (1st ed. (1906). pp. "Regelung SOS is a Morse code distress signal (), used internationally, originally established for maritime use. p. 318-322. In International Morse Code three dots form the letter "S" and three dashes make the letter "O", so "S O S" became a common way to remember the order of the dots and dashes. In formal notation SOS is written with an overscore line (SOS), to indicate that the Morse code equivalents for the individual letters of "SOS" are transmitted as an unbroken sequence of three dots / three dashes / three dots, with no spaces between the letters. IWB, VZE, 3B, and V7 form equivalent sequences, but traditionally SOS is the easiest to remember.). and Telephony. S. Robison, S. 112. "Codes"; eb30f9229d

Decontamination foam Decon foam has been found to make numerous chemical and biological agents harmless. at conventions, airports, concerts). g. It is also intended for use in areas where large numbers of people have possibly been contaminated (e. For decontamination foam to be successful Decontamination foam (known commonly as decon foam) is a spray-on cleaning solution used on surfaces that have been contaminated with biological or chemical agents (e. g. aqueous-based decontaminants are better with polar surfaces like concrete, but have the potential to corrode surfaces. , chemical warfare agents, anthrax spores or toxic industrial materials) eb30f9229d

Free stationing By a geometric transformation, these polar coordinates are transformed In surveying, free stationing (also known as resection) is a method of determining a location of one unknown point in relation to known points. When setting up the total station on a known point, it is often not possible to see all survey points of interest. When performing a resection (free stationing) with the total station, bearings and distances are measured to at least two known points of a control network. With use of a handheld computer, recorded data can be related to local polar coordinates, defined by the horizontal circle of the total station. The instrument can be freely positioned so that all survey points are at a suitable sight from the instrument. related to local polar coordinates, defined by the horizontal circle of the total station. There is a zero point of reference called a total station. By a geometric transformation, these polar coordinates are transformed eb30f9229d

Ny-Ålesund Airport, Hamnerabben airship hangar and mast. The airport is owned by Kings Bay, who also owns the company town. The services are organized as corporate charters and tickets are only available after permission from Kings Bay. The only flights available are to Svalbard Airport, Longyear, operated two to four times a week by Lufttransport using Dornier 228 aircraft. The first proposal for an airport in Ny-Ålesund was launched in 1956 by Norsk Polar Navigasjon, who proposed an airport at Kvadehuksletta Ny-Ålesund Airport, Hamnerabben (Norwegian: Ny-Ålesund flyplass, Hamnerabben; ICAO: ENAS) is an airport serving the research community of Ny-Ålesund in Svalbard, Norway eb30f9229d

Visible differences between the 700 and the 900 Series included redesigned rear styling of the saloon models (late 700 estates and early 900 estates are visually identical). The 960 was introduced in 1991 along with a new family of modular engines, and then was substantially revised for the 1995 model year, improving the handling. The range was augmented... eb30f9229d

Volvo 900 Series Towards the end of the model cycle, certain The Volvo 900 Series is a range of executive cars produced by the Swedish manufacturer Volvo Cars from 1990 to 1998. The 900 Series was introduced in 1990 to replace the 700 Series from which it derived. From MY 1993 on, in Italy all 940 estates were badged "Polar" (engine B200F) or "Super Polar" (engine B200FT). Prior to the end of its production, the 960 was renamed as the Volvo S90 (saloon) and Volvo V90 (estate), and the 940 was renamed 940 Classic, becoming the last rear-wheel-drive cars from Volvo, until the 2023 Volvo XC40 Recharge Pure Electric eb30f9229d

Latitude The axis of rotation varies slowly over time and the values given here are those for the current - In geography, latitude is a geographic coordinate that specifies the north-south position of a point on the surface of the Earth or another celestial body. latitude of the polar circles is its complement (90° i). Latitude is given as an angle that ranges from −90° at the south pole to 90° at the north pole, with 0° at the Equator. Latitude and longitude are used together as a coordinate pair to specify a location on the surface of the Earth. Lines of constant latitude, or parallels, run east-west as circles parallel to the equator eb30f9229d

Volvo 200 Series Special models (e. Polar and Torslanda) sometimes omit the 240. Designed by Jan Wilsgaard, the series was developed from the Volvo 140 Series and incorporated safety innovations from Volvo's VESC experimental safety vehicle program. Argentine polar dog It was created by the Argentine Army to haul freight around its bases in Antarctica. The breed was a cross between a Spitz, which were traditionally used as sled dogs, and several other breeds, including the Alaskan Malamute, the Siberian Husky, the Greenland Dog, and the Samoyed. The practice of breeding Argentine polar dogs came to an end in 1991, when Article 4 of the Antarctic Treaty forced the removal of all non-native species from the continent. It was created by the Argentine Army to haul freight around its bases in Antarctica. The Argentine polar dog is an extinct breed of dog.
