The Food and Drug Administration (FDA) and the United States Department of Agriculture (USDA) require mandatory HACCP programs for juice and meat as an effective approach to food safety and protecting public health. In this manner, HACCP attempts to avoid hazards rather than attempting to inspect finished products for the effects of those hazards. In the UK the Chartered Institute Hazard analysis and critical control points, or HACCP (), is a systematic preventive approach to food safety from biological, chemical, and physical hazards in production processes that can cause the finished product to be unsafe and designs measures to reduce these risks to a safe level. However, ASQ does provide a Trained HACCP Auditor (CHA) exam to individuals seeking professional training 4de6230ee6
