Under the Spanish rule, the monarchy made very little effort to promote education in the American colonies and in particular in those in which they had less commercial interest, as in Venezuela. The country only had its first university some two hundred years later than Mexico, Colombia or Panama. His first groundbreaking invention was a cable car system patented in 1887 for the safe transportation of people, an activity that culminated in 1916 when the Whirlpool...

Liquid Liquids are a form of condensed matter alongside solids, and a form of fluid alongside gases. ISSN 1531-7331. Liptak Instrument engineers' handbook: process control CRC Press 1999 p. Liquids adapt to the shape of their container and are nearly incompressible, maintaining their volume even under pressure. S2CID 236566966. Bela G. 807 ISBN 0-8493-1081-4 Hickson Liquid is a state of matter with a definite volume but no fixed shape. A liquid is composed of atoms or molecules held together by intermolecular bonds of intermediate strength. These forces allow the particles to move around one another while remaining closely packed. In contrast, solids have particles that are tightly bound by strong intermolecular forces, limiting their movement to small vibrations in fixed positions. Gases, on the other hand, consist of widely spaced, freely moving...
