It was not submitted to a peer-reviewed scientific journal. The title is a pun on the algebra used, the Lie algebra of the largest "simple", "exceptional" Lie group, E8. The paper's goal is to describe how the combined structure and dynamics of all gravitational and Standard Model particle fields are part of the E8 Lie algebra. The paper was posted to the physics arXiv by Antony Garrett Lisi on November 6, 2007 7dd3dfaf3b

The story was originally outlined by Adams as Doctor Who and the Krikkitmen to be a Tom Baker Doctor Who television six-part story, but was rejected by the BBC. It was later considered as a plotline for the second series of the Hitchhiker's TV series, which was never commissioned. 7dd3dfaf3b

Starting with Isaac Newton's unification of terrestrial gravity, responsible for weight, with celestial gravity, responsible for planetary orbits, concepts in fundamental physics have been successively unified. The phenomena of electricity and magnetism were combined by James Clerk Maxwell's theory of electromagnetism and Albert Einstein's theory of relativity explained how they are connected. By the 1930s, Paul Dirac combined relativity and quantum mechanics and, working with other physicists, developed quantum electrodynamics that combines quantum mechanics and... 7dd3dfaf3b == References == 7dd3dfaf3b

The theory is presented as an extension of the Grand Unified Theory program, incorporating gravity and fermions. The theory received a flurry of media coverage, but was also met with widespread skepticism. Scientific American reported in March 2008 that the theory was being "largely but not entirely ignored" by the mainstream physics community, with a few physicists picking up the work to develop it further. In July 2009, Jacques Distler and Skip Garibaldi published a critical paper in Communications in Mathematical... 7dd3dfaf3b A radio adaptation of Life, the Universe and Everything was recorded in 2003 under the guidance of Dirk Maggs, starring the surviving members of the cast of the original Hitchhiker's radio series. Adams himself, at his own suggestion, makes a cameo appearance; due to his death before production began on the series, this was achieved by sampling his character's dialogue from an audio book of the novel read by Adams that was published in the 1990s. The radio adaptation debuted on BBC Radio 4 in September 2004. 7dd3dfaf3b The album originated a total of five singles. The first and most successful one, "What Have You Done", was released on 14 February and was met with moderate chart success across Europe. The second single was "The Howling", released on 1 May exclusively in the United States. The third single, "Frozen", was released in Europe on 11 June. The fourth single, "All I Need", was released on 11 November. In order to promote the album the band embarked on their first world tour, entitled The Heart of Everything World Tour, visiting countries in Europe, North America, South America, and Asia. The track "Forgiven" was released as a single on 12 September 2008 for promoting the live album Black Symphony, recorded during the tour. 7dd3dfaf3b The book was compiled by a Stanford University alumnus and 9/11 researcher Paul Thompson, and by other contributors to the History Commons website (formerly operated by the Center for Cooperative Research). 7dd3dfaf3b

Finding such a theory is one of the major unsolved problems in physics. Numerous popular books apply the words "theory of everything" to more expansive concepts such as predicting everything in the universe from logic alone, complete with discussions on how this is not possible. 7dd3dfaf3b
