Clouds and the Earth's Radiant Energy System The CERES are scientific satellite instruments, part of NASA's Earth Observing System (EOS), designed to measure solar-reflected and Earth-emitted radiation from the top of the atmosphere (TOA) to the Earth's surface. Results from the CERES and other NASA missions, such as the Earth Radiation Budget Experiment (ERBE), could enable near-real-time tracking of Earth's energy imbalance (EEI) and better understanding of the role of clouds in global climate change.
