Grenade launchers are produced in the form of standalone weapons (either single shot or repeating) or as attachments mounted to a parent firearm, usually a rifle. Larger crew-served automatic grenade launchers such as the Mk 19 are mounted on tripods or vehicles. a952e9b091 ArmaLite sold the patent and trademarks for both to Colt's Manufacturing Company in 1959 after the military rejected the design in favor of the M14. After most of the patents for the Colt AR-15 expired in 1977, many firearm manufacturers began to produce copies of the rifle under various names. While the patents are expired, Colt has retained the trademark to the AR-15 name and is the sole manufacturer able to label their firearms as such. a952e9b091

ArmaLite AR-18 military as the M16. AR-15 style stocks (and comes with a collapsible AR15 stock). S. As Length of pull (LOP) is long with many AR15 stocks, some users have retrofit Cz Vz58 folding The ArmaLite AR-18 is a gas-operated rifle chambered for 5. The AR-18 was designed at ArmaLite in California by Arthur Miller, Eugene Stoner, George Sullivan, and Charles Dorchester in 1963 as an alternative to the Colt AR-15 design, a variant of which had just been selected by the U. While the AR-18 was never adopted as the standard service rifle of any nation, its production license was sold to companies in Japan and the United Kingdom, and it is said to have influenced many later weapons such as the British SA80, the Singaporean SAR-80 and SR-88, the Belgian FN F2000, the Japanese Howa Type 89 and the German Heckler and Koch G36. A semi-automatic version known as the AR-180 was later produced for the civilian market. 56×45mm NATO ammunition a952e9b091
