The inhabitants of rural areas were mostly farmers, although some were also hunters, fishers, or government employees working in mines or the salt marshes. As landholders and drafted government officials, the gentry considered themselves the leading members of society; gaining their cooperation and employment. Conversely, shopkeepers, artisans, city guards, entertainers, laborers, and wealthy merchants lived in the county and provincial centers along with the Chinese gentry—a small, elite community of educated scholars and scholar-officials f86c5457d6

On a psychodynamic level, technophilia generates the expression of its opposite, technophobia. Technophilia and technophobia are the two extremes of the relationship between technology and society. The technophile regards most or all technology positively, adopts new forms of technology enthusiastically, sees it as a means to improve life, and whilst some may even

view it as a means to combat social problems. f86c5457d6
