Vehicle registration plates of New Zealand To be operated on (or parked on) any public road, most types of motor vehicles and trailers must be registered and display the corresponding registration plate(s). One plate must be affixed to the rear of the vehicle, and except in the case of a motorcycle, moped, tractor, or trailer, a second plate must be affixed to the front of the vehicle. dealers for similar use, while some Hyundai and Kia cars feature plates with serials in the HYU and KIA series respectively. Serials in the CCC and DCC In New Zealand, vehicle registration plates (usually called number plates) contain up to six alphanumeric characters, depending on the type of vehicle and the date of registration c21335c332

Fascia (car) model line (see the 'shark' grille by Mitsubishi, or 'tiger-nose' grille by Kia). The word comes from the Italian word

Kia Engine Identification

fascia (pronounced ['fʌʃiə]), meaning Fascia () is a term used in the automotive world that refers to the decorative panels of a car's dashboard or the dashboard assembly c21335c332

Volkswagen emissions scandal However, the vehicles emitted up to 40 times more NOx in real-world driving. The agency had found that Volkswagen had intentionally programmed turbocharged direct injection (TDI) diesel engines to activate their emissions controls only during laboratory emissions testing, which caused the vehicles' NOx output to meet US standards during regulatory testing. While not all using defeat devices, diesel vehicles built by a wide range The Volkswagen emissions scandal, sometimes known as Dieselgate or Emissionsgate, began in September 2015, when the United States Environmental Protection Agency (EPA) issued a notice of violation of the Clean Air Act to German automaker Volkswagen Group. Nissan and Renault, Chevrolet and GMC, Ford, Cummins, as well as Hyundai and Kia. Volkswagen deployed this software in about 11 million cars worldwide, including 500,000 in the United States, in model years 2009 through 2015 c21335c332

(Under ML badge until 2005) Body-on-frame is a traditional motor vehicle construction method whereby a separate body or coach is mounted on a strong and relatively rigid vehicle frame or chassis that carries the powertrain (the engine and drivetrain) and to which the wheels and their suspension, brakes, and steering are mounted. Whereas this was the original method of building automobiles, body-on-frame construction is now used mainly for pickup trucks, large SUVs, and heavy trucks c21335c332

A bumper valance panel, a piece that is mounted on top of the bumper, or is right under it, is also considered a part of the vehicle's fascia. Carmakers often design the body panels that form the nose of their vehicles to have a unified look across their model line (see the 'shark' grille by Mitsubishi, or 'tiger-nose' grille... c21335c332 Regulations affecting bumper design in the late 1970s saw the increasing use of soft plastic materials on the front and rear of vehicles. Fascia was adopted then as the term to describe these soft areas, but is now increasingly used as a general term for a car's set of front-end components: grille, headlamps, front bumper, and other details. c21335c332 If the visibility of a regular number plate is obstructed, for example by a bike rack mounted to a

especially low, creating a flexible and regularised cargo volume that is large for its class. c21335c332 The methods used to categorise cars into models differ significantly between manufacturers. Frequently, several different body variants are offered, depending on market demand; and when completing their 'production lifespan', sufficiently successful models are usually followed by a new 'generation' of that model. c21335c332 The name of a model (range or series) is almost always trademarked, so that competing manufacturers cannot also use it (unless the owner permits it, for an agreed licence fee). c21335c332

Immobiliser The Kia Challenge TikTok trend was linked to a series of Hyundai/Kia vehicle thefts in 2022. Research shows that the uniform application of immobilisers reduced the rate of car theft by 40%. Numerous vulnerabilities An immobiliser or immobilizer is an electronic security device fitted to a motor vehicle that prevents the engine from being started unless the correct key (transponder or smart key) is present. This prevents the vehicle from being "hot wired" after entry has been achieved and thus reduces motor vehicle theft. County, Wisconsin and Columbus, Ohio c21335c332
