List of examples of convergent evolution Distantly related organisms often develop analogous structures by adapting to similar environments. (2001). The ultimate cause of convergence is usually a similar evolutionary biome, as similar environments will select for similar traits in any species occupying the same ecological niche, even if those species are only distantly related. "Evolution of insect abdominal appendages: Are Convergent evolution—the repeated evolution of similar traits in multiple lineages which all ancestrally lack the trait—is rife in nature, as illustrated by the examples below. ; Palopoli, M. In the case of cryptic species, it can create species which are only distinguishable by analysing their genetics. 1007/s102110100038, S2CID 37840769 Suzuki, Y.
