

Cosmic Manuscript

Liber Floridus The text compiles extracts from some 192 or so different works. Ages that slowly superseded the work of Isidore of Seville. The original manuscript, completed in 1120 and dedicated to Saint Omer by Lambert, has been preserved **Liber Floridus** ("Book of Flowers") is a medieval encyclopedia that was compiled between 1090 and 1120 by Lambert, Canon of Saint-Omer

Lambert's medieval encyclopedia contains a universal history, a chronological record of events to the year 1119. These are of Biblical, astronomical, geographical, philosophical and natural history subjects. Lambert wrote **Liber Floridus** originally in Latin, and later it was translated into French as *Le Livre fleurissant en fleurs*. A detailed description is in the *Historia comitum Normannorum, comitum Flandriae*. In 20th-century comparative mythology, the term *axis mundi* – also called the cosmic axis, world axis, world pillar, center of the world, or world tree – has been greatly extended to refer to any mythological concept representing "the connection between Heaven and Earth" or the "higher and lower realms". Mircea Eliade introduced the concept in the 1950s. *Axis mundi* closely relates to the mythological concept of the *omphalos* (navel) of the world or cosmos... He wrote for some years but submitted nothing until completing the manuscript of *Cosmic Dance*, passed on by Heinemann Caribbean to Peepal Tree Press on... The CMB is landmark evidence...

Cosmic egg The egg is sometimes lain on the primordial waters of the Earth. Typically, the upper half of the egg, or its outer shell, becomes the heaven (firmament) and the lower half, or the inner yolk, becomes the Earth. The cosmic egg, world egg or mundane egg is a mythological motif found in the cosmogonies of many cultures and civilizations, including in Proto-Indo-European The cosmic egg, world egg or mundane egg is a mythological motif found in the cosmogonies of many cultures and civilizations, including in Proto-Indo-European mythology. The motif likely stems from simple elements of an egg, including its ability to offer nourishment and give rise to new life, as is reflected by the Latin proverb *omne vivum ex ovo* ('all life comes from an egg'). Typically, there is an egg which, upon "hatching", either gives rise to the universe itself or gives rise to a primordial being who, in turn, creates the universe

Axis mundi Consequently, in ancient Greco-Roman astronomy, the *axis mundi* is the axis of rotation of the planetary spheres within the classical geocentric model of the cosmos. In a geocentric coordinate system, this is the axis of rotation of the celestial sphere. 20th-century comparative mythology, the term *axis mundi* – also called the cosmic axis, world axis, world pillar, center of the world, or world tree – has In astronomy, *axis mundi* is the Latin term for the axis of Earth between the celestial poles

Cosmic microwave background With a standard optical telescope, the background space between stars and galaxies is almost completely dark. Its total energy density exceeds that of all the photons emitted by all the stars in the history of the universe. With a standard The cosmic microwave background (CMB, CMBR), or relic radiation, is microwave radiation that fills all space in the observable universe. The cosmic microwave background (CMB, CMBR), or relic radiation, is microwave radiation that fills all space in the observable universe. This glow is strongest in the microwave region of the electromagnetic spectrum. The accidental discovery of the CMB in 1965 by American radio astronomers Arno Allan Penzias and Robert Woodrow Wilson was the culmination of work initiated in the 1940s. However, a sufficiently sensitive radio telescope detects a faint background glow that is almost uniform and is not associated with any star, galaxy, or other object

The institute consists of three schools: the School of Theoretical Physics, the School of Cosmic Physics and the School of Celtic Studies. The directors of these schools were, as of 2023, Professor Denjoe O'Connor, Professor Tom Ray and Professor Ruairí Ó hUiginn. The institute, under its governing act, is empowered to "train students in methods of advanced research" but does not itself award degrees; graduate students working under the supervision of Institute researchers can, with the agreement of the... The **Liber Floridus** was the first of the encyclopedias of the High Middle Ages that slowly superseded the work of Isidore of Seville. The original manuscript, completed in 1120 and dedicated... The term "cosmic egg" is also used in the modern... During the 1980s he catered to the desire of the villagers of Uitvlugt and nearby communities to read by running a paperback library at a time when books were almost impossible to obtain in Guyana. Inflation theory was developed in the late 1970s and early 1980s, with notable contributions by several theoretical physicists, including Alexei Starobinsky at Landau Institute for Theoretical Physics, Alan Guth at Cornell University, and Andrei Linde at Lebedev Physical Institute. Starobinsky, Guth, and Linde won the 2014 Kavli Prize "for pioneering the theory of cosmic inflation". It was developed...

Cosmic inflation The re-acceleration of this slowing expansion due to dark energy began after the universe was already over 7. In physical cosmology, cosmic inflation, cosmological inflation, or just inflation, is a theory of exponential expansion of space in the very early universe In physical cosmology, cosmic inflation, cosmological inflation, or just inflation, is a theory of exponential expansion of space in the very early universe. 7 billion years old (5. 4 billion years ago). Following the inflationary period, the universe continued to expand, but at a slower rate

Bakhshali manuscript Up until Sep 2024 the manuscript is known to have contained the earliest known Indian use of a zero symbol. In October 2024, Oxford University revised its, 2017, radiocarbon dating of the manuscript, to 799 - 1102 AD (9th - 11th century Approx). release in 2017, offered carbon-dates between AD 224-383, and AD 885-993, from sample taken from three folios. 2017 and Houben 2018 §3). The open manner and timing of the publication of the 2017 test dates was criticised by a group of Indian mathematical historians (Plofker et al. The Bakhshali manuscript is an ancient Indian mathematical text written on birch bark that was found in 1881 in the village of Bakhshali, Mardan (near The Bakhshali manuscript is an ancient Indian mathematical text written on birch bark that was found in 1881 in the village of Bakhshali, Mardan (near Peshawar in present-day Pakistan, historical Gandhara). It is perhaps "the oldest extant manuscript in Indian mathematics"

Macranthropy This concept has historical roots in Macranthropy is an allegorical concept where the universe is portrayed as a giant human body, with various cosmic elements represented as body parts. This concept has historical roots in several ancient civilizations. concept where the universe is portrayed as a giant human body, with various cosmic elements represented as body parts 44a87a7767

Dublin Institute for Advanced Studies consists of three schools: the School of Theoretical Physics, the School of Cosmic Physics and the School of Celtic Studies. It was established, under the Institute For Advanced Studies Act 1940, by the government of the then Taoiseach, Éamon de Valera. The directors of these schools The Dublin Institute for Advanced Studies (DIAS) (Irish: Institiúid Ard-Léinn Bhaile Átha Cliath) is a statutory independent research institute in Dublin, Ireland 44a87a7767

Chu Silk Manuscript writer of the manuscript was concerned that the calendar be used with proper respect and knowledge. Otherwise, the text threatens, cosmic collapse and The Chu Silk Manuscript (traditional Chinese: 竹書紀年; simplified Chinese: 竹书纪年; pinyin: Chǔ Bóshū; Wade-Giles: Ch'u Po-shu), also known as the Chu Silk Manuscript from Zidanku in Changsha (traditional Chinese: 戰國楚簡; simplified Chinese: 战国楚简; pinyin: Chángshā Zhàngǎn Chǔ Bóshū; Wade-Giles: Ch'ang-sha Tzu-tan-k'u Ch'u Po-shu), is a Chinese astrological and astronomical text. 300 BCE) Warring States period tomb from the southern Chinese state of Chu. It was discovered in a (c 44a87a7767

Harischandra Khemraj Upon his return to Guyana in the mid 70's, he worked as a payroll clerk, civil servant, bank statistician, a short order cook, a librarian, a telephone operator and a teacher in West Coast Demerara. wrote for some years but submitted nothing until completing the manuscript of Cosmic Dance, passed on by Heinemann Caribbean to Peepal Tree Press on the Harischandra Khemraj (born 1944) is a writer from Guyana. He was born and grew up on a sugar estate in West Bank Demerara, where his parents were both sugar workers in the 1940s. He attended school in Guyana and Howard University in the United States 44a87a7767
