Nonmetal Shanabrook, Lannin & Hisatsune 1981, pp. 1-1 Aylward & Findlay 2008, p. They range from colorless gases like hydrogen to shiny crystals like iodine. Chemically, nonmetals have relatively high electronegativity or usually attract electrons in a chemical bond with another element, and their oxides tend to be acidic. 130–133 Weller et al. Physically, they are usually lighter (less dense) than elements that form metals and are often poor conductors of heat and electricity. 18 Ganguly 2012, p. 2018, preface Abbott 1966, p. 132 Aylward In the context of the periodic table, a nonmetal is a chemical element that mostly lacks distinctive metallic properties f41fa21f5b
