Cosmic ray Radioactivity: A History of a Mysterious Cosmic rays or astroparticles are high-energy particles or clusters of particles (primarily represented by protons or atomic nuclei) that move through space at nearly the speed of light. (25 August 2011). HyperPhysics. They originate from the Sun, from outside of the Solar System in the Milky Way, and from distant galaxies. Georgia State University. Retrieved 17 February 2013. Upon impact with Earth's atmosphere, cosmic rays produce showers of secondary particles, some of which reach the surface, although the bulk are deflected off into space by the magnetosphere or the heliosphere. Malley, Marjorie C. Department a6b89c95ea

Direct measurement of cosmic rays, especially at lower energies, has been possible since the launch of the first satellites in the late 1950s. Particle detectors similar... a6b89c95ea → Contest entries a6b89c95ea Main page a6b89c95ea → Current statistics a6b89c95ea Core work areas a6b89c95ea Contests a6b89c95ea talk a6b89c95ea → Scoreboard archive a6b89c95ea → Scoring log archive a6b89c95ea → Bugle newsroom a6b89c95ea → Discussion alert box a6b89c95ea + talk a6b89c95ea → B-Class FAQ a6b89c95ea Academy a6b89c95ea → Current groups and initiatives a6b89c95ea → Review alert box a6b89c95ea Main page a6b89c95ea → Handbook a6b89c95ea
