2015). "Google announces new Chromecast hardware with improved Wifi, same great price". Content can be mirrored to video models from the Google Chrome web browser on a personal computer or from the screen of some Android devices. The user can control playback with a mobile device or personal computer through mobile and web apps that can use the Google Cast protocol, or by issuing commands via Google Assistant; later models introduced an interactive user interface and remote control 8d2aacd969

A mesh refers to rich interconnection among devices or nodes. Wireless mesh networks often consist of mesh clients, mesh routers and gateways. Mobility of nodes is less frequent. If nodes constantly or frequently move, the mesh spends more time updating routes than delivering data. In a wireless mesh network, topology tends to be more static, so that routes 8d2aacd969

SPHERES experiment. 8d2aacd969

Pixel Watch Development on a new Pixel-branded watch began shortly after Google's acquisition of Fitbit. First previewed in May 2022 during the Google I/O keynote, it features a round dome-shaped display as well as deep integration with Fitbit, which Google acquired in 2021. Due to the base's curved design, it can only be wirelessly charged with Google's proprietary magnetic charger. The Pixel Watch is a Wear OS smartwatch designed, developed, and marketed by Google as part of the Google Pixel product line. Two Pixel-branded smartwatches had been in development at Google by July 2016, but were canceled ahead of their release due to hardware chief Rick Osterloh's concerns that they did not fit well with other Pixel devices. mechanism manufactured by Compal Electronics 8d2aacd969

Wireless mesh network A wireless mesh network (WMN) is a
