PHP It was originally created by Danish-Canadian programmer Rasmus Lerdorf in 1993 and released in 1995. The PHP reference implementation is now produced by the PHP Group. PHP was originally an abbreviation of Personal Home Page, but it now stands for the recursive backronym PHP: Hypertext Preprocessor. ceased to support PHP 4 in new code from February 5, 2008, because of the GoPHP5 initiative, provided by a consortium of PHP developers promoting the transition PHP is a general-purpose scripting language geared towards web development 194ab8f254

PHP code is usually processed on a web server by a PHP interpreter implemented as a module, a daemon or a Common Gateway Interface (CGI) executable. On a web server, the result of the interpreted and executed PHP code—which may be

any type of data, such as generated HTML or binary image data—would form the whole or part of an HTTP response. Various web template systems, web content management systems, and web frameworks... 194ab8f254 The result was delete. MBisanz 03:02, 28 January 2009 (UTC)[reply] 194ab8f254 Miscellaneous 194ab8f254 Once started, AWB loads the first page on the list and executes the changes that were provided by the user. When it is done editing a page, it displays the differences between the original and modified versions of the page, and waits for the user to accept the changes or decide to skip the page. Before making such a decision... 194ab8f254 Computing desk archive 194ab8f254 Frameworks are grouped below. For unit testing, a framework must be the same language as the source code under test, and therefore, grouping frameworks by language is valuable. But some groupings transcend language. For example, .NET groups frameworks that work for any language supported for .NET, and HTTP groups frameworks that test an HTTP server regardless of the implementation language on the server. 194ab8f254 The use of file name extension varies by operating system and file system. Some older file systems, such as File Allocation Table (FAT), limited an extension to 3 characters but modern systems do not. Microsoft operating systems (i.e. MS-DOS and Windows) depend more on the extension to associate contextual and semantic meaning to a file than Unix-based systems. 194ab8f254 Welcome to the Wikipedia Computing Reference Desk Archives 194ab8f254

Eval php \$foo = "Goodbye, world. The input to eval is not necessarily a string; it may be structured representation of code, such as an abstract syntax tree (like Lisp forms), or of special type such as code (as in Python). 1, loadstring compiles Lua code into In some programming languages, eval , short for evaluate, is a function which evaluates a string as though it were an expression in the language, and returns a result; in others, it executes multiple lines of code as though they had been included instead of the line including the eval. The analog for a statement is exec, which executes a string (or code in other format) as if it were a statement; in some languages, such as Python, both are present, while in other languages only one of either eval or exec is. > In Lua 5. returning a value: <. \n"; //does not work in PHP5 echo eval('return \$foo;'); 194ab8f254

Language 194ab8f254 Each format is identified by a capitalized word that is the format's full or abbreviated name. The typical file name extension used for a format is included in parentheses if it differs from the identifier, ignoring case. 194ab8f254

List of unit testing frameworks GitHub. Retrieved 2018-09-10. "imb/fctx". gnome. Such frameworks are not limited to unit-level testing; can be used for integration and system level testing. Garage This is a list of notable test automation frameworks commonly used for unit testing.

Wikipedia:AutoWikiBrowser/User manual AWB is a semi-automatic wiki-editor
created to edit Wikipedia and other wikis hosted with the MediaWiki software.
Use. php5 extension — available Welcome to the User manual for
AutoWikiBrowser, also known as AWB. part of the AWB manual needs help in
explaining its function. Among other things, AWB is designed to perform search &
replace instructions provided by the user, upon a list of pages it assists the user in
making. It also has numerous settings for specifying related actions, such as
skipping pages, adding material to the beginning or end of each page, etc. If you
know how this function works, please feel free to edit 194ab8f254
