Wikipedia article that meets a core set of editorial standards, the good  
article criteria, passing through the good article nomination process  
successfully. They are well-written, contain factually accurate and  
verifiable information, are broad in coverage, neutral in point of view,  
stable, and illustrated, where possible, by relevant images with suitable  
copyright licenses. Good articles do not have to be as comprehensive as  
featured articles (FA), but they should not omit any major facets: a
