Resuscitative endovascular balloon occlusion of the aorta REBOA is performed first by achieving access to the common femoral artery (CFA) and advancing a catheter within the aorta. Upon successful catheter placement, an occluding balloon may be inflated either within the descending thoracic aorta (Zone 1) or infrarenal abdominal aorta (Zone 3). Manley J, Becker T, Dubose J (2020-03-30). Joint Resuscitative endovascular balloon occlusion of the aorta (REBOA) is a minimally-invasive procedure performed during resuscitation of critically-injured trauma patients. "Resuscitative Endovascular Balloon Occlusion of the Aorta (REBOA) for Hemorrhagic Shock (CPG ID:38)" (PDF). REBOA stanches downstream hemorrhage and improves cardiac index, cerebral perfusion, and coronary perfusion. Originally developed as a less invasive alternative to emergency thoracotomy with aortic cross clamping, REBOA is performed to gain rapid control of non-compressible truncal or junctional hemorrhage. Although REBOA does not eliminate 66e9b23327

For knee arthroscopy only two small incisions are made, one for the arthroscope and one for the surgical instruments to be used in the knee cavity. This reduces recovery time and may increase the rate of success due to less trauma to the connective tissue. It has gained popularity due to evidence of faster recovery times with less scarring, because of the... 66e9b23327

Dupuytren's contracture Cochrane Database of Systematic Reviews. (2015-12-09). It can affect one or both hands. Meniscus tear Especially acute injuries (typically in younger, more active patients) can lead to displaced tears which can cause mechanical symptoms such as clicking, catching, or locking during motion. chance of meniscus tears. The traumatic action is most often a twisting movement at the knee while the leg is bent. They can also be torn by traumatic force encountered in sports or other forms of physical exertion. In older adults, the meniscus can be damaged following prolonged 'wear and tear'. When doctors and patients refer to "torn cartilage" in the knee, they actually may be referring to an injury to a meniscus at the top of one of the tibiae. This study showed meniscus tears occurring at a rate of 50-70% depending on how long after the ACL injury the surgery occurred A tear of a meniscus is a rupturing of one or more of the fibrocartilage strips in the knee called menisci. Menisci can be torn during innocuous activities such as walking or squatting 66e9b23327

Chargemaster Essentials of Managed Health In the United States, the chargemaster, also known as charge master, or charge description master (CDM), is a comprehensive listing of items billable to a hospital patient or a patient's health insurance provider. In practice, it usually contains highly inflated prices at several times that of actual costs to the hospital. The chargemaster typically serves as the starting point for negotiations with patients and health insurance providers of what amount of money will actually be paid to the hospital. It is described as "the central mechanism of the revenue cycle" of a hospital. Sheet for The Essentials of Managed Health Care, Sixth Edition, Jones & Bartlett" (PDF). Gaucha (album) Erlewine, Stephen Gaucha is the seventh studio album by the American rock band Steely Dan, released on November 21, 1980, by MCA Records. jazz-rock wasn't enough, with Gaucha, Fagen and Becker approached anti-music in the same way that plastic surgery approaches being anti-human. The album marked a significant stylistic shift for the band, with more focus on rhythm and atmosphere than their earlier work, but the recording sessions demonstrated the group's typical obsessive nature and perfectionism, as they used at least 42 different session musicians, spent over a year in the studio, and far exceeded the original monetary advance given by the record label. At the 24th Annual Grammy Awards, Gaucha won Best Engineered Recording – Non-Classical, and was nominated for Album of the Year and Best Pop Performance by a Duo or Group with Vocals 66e9b23327
